The ILLINOIS STATE NORMAL UNIVERSITY - NORMAL, ILL.

The NORMAL SCHOOL QUARTERLY

SERIES 13 NUMBER 56 JULY, 1915

FIFTY-SEVENTH ANNUAL CATALOG WITH ANNOUNCEMENTS for 1915-16

PUBLISHT IN JULY, OCTOBER, JANUARY & APRIL, EACH YEAR

Whenever two spellings of a word are authorized by the New International or the New Standard Dictionary, it is the practis of the State Normal University to use in its publications the shorter form.

BOARD OF EDUCATION OF THE STATE OF ILLINOIS

CHARLES L. CAPEN, Bloomington, President
FRANCIS G. BLAIR, Springfield
Ex-Officio Member and Secretary

E. R. E. KIMBROUGH, Danville
J. STANLEY BROWN, Joliet
FRANK B. STITT, El Paso
WILLIAM P. WALL, Staunton
JOHN J. AMSLER, East Peoria
ADRIAN M. DOOLIN, Chicago
SILAS ECHOLS, Mt. Vernon
A. R. SMITH, Quincy
C. W. MUNDELL, Benton
HENRY HOFF, Germantown
JOHN L. BRUMMERSTEDT, Altamont
GEORGE W. HUGHES, Hume
HENRY OAKES, Bluffs

F. D. MARQUIS, Bloomington, Tresurer

CALENDAR FOR 1915-16

The school year of forty-eight weeks is divided into three terms of twelv weeks each, and two summer terms of six weeks each. A mid-spring term of six weeks runs parallel to the last half of the spring term.

Summer Session. 1915

Monday, June 14—First Term begins.
Monday, July 26—Second Term begins.
Wednesday. September 1—Second Term ends.

Fall Term, 1915

Monday, September 6—Opening of Training School.

Monday, September 13—Fall Term begins, Normal and High School departments.

Friday, December 3—Fall Term ends.

Winter Term, 1915-16

Monday, December 6—Winter Term begins.

Wednesday, December 15—Semi-annual Meeting of the Board of Education.

Friday, December 17—Annual Contest of the Literary Societies.

Saturday, December 18—Recess of two weeks.

Monday, January 3, 1916—Winter Term resumes.

Friday, February 18—Founders' Day Celebration.

Saturday, February 26—Annual Contest in Oratory.

Friday, March 10—End of Winter Term.

Vacation of nine days.

Spring Term, 1916

Monday, March 20—Spring Term begins.
Friday, April 28—Oskosh-Terre Haute-Normal Debate.
Monday, May 1—Mid-Spring Term begins.
Friday, May 26—Junior Class Play.
Wednesday, June 7—Annual Meeting of the Board of Education.
Thursday, June 8—Annual Commencement Exercises.

Summer Session. 1916

Monday, June 12—First Summer Term begins.

Monday, July 24—Second Summer Term begins.

Wednesday, August 30—Second Summer Term ends.

Monday, September 11—Beginning of Fall Term of year
1916-17.

FACULTY

DAVID FELMLEY, A. B., LL.D., President. HENRY McCORMICK, Ph. D., LL.D., Vice-President, Emeritus. ORSON LEROY MANCHESTER, A. M., LL.D., Dean,

Professor of Languages and Economics.

I. ROSE COLBY, Ph.D.,

Professor of Literature. MANFRED JAMES HOLMES, B. L.,

Professor of Pedagogy and History of Education.

FREDERICK DELOS BARBER, A. M.,

Professor of Physics.

GEORGE HENRY HOWE, Ph. D., Professor of Mathematics.

FRANK WILLIAM WESTHOFF.

Teacher of Music. DOUGLAS CLAY RIDGLEY, A. B ...

Professor of Geografy. EDWIN ARTHUR TURNER, A. M.,

Director of the Training School.

JOHN LOSSEN PRICER, A. M., Professor of Biological Science.

ADNAH CLIFTON NEWELL, B. S., Director of Manual Training.

WILLIAM ANDREW LAWRENCE BEYER, A. M., Professor of History.

HARVEY ANDREW PETERSON, Ph. D., Professor of Psychology.

HOWARD WILLIAM ADAMS, B. S., Professor of Chemistry.

HARRY ALBERT McGILL, A. M.,

Professor of Political Science. IRWIN ARTHUR MADDEN, B. S., Professor of Agriculture.

HERMANN HENRY SCHROEDER, Ph. B. Professor of Education.

CHESTER MILTON SANFORD, A. B., Professor of Public Speaking.

CLARISSA ELIZABETH ELA,

Teacher of Art.

ELMER WARREN CAVINS,

Teacher of Penmanship and Orthografy. ALICE JEAN PATTERSON, S. B.,

Teacher of Nature Study.

FACULTY (Continued)

MABEL CUMMINGS,
Director of Physical Education for Women.
OLIVE LILLIAN BARTON, A. B.,
Assistant in Mathematics and Acting Dean of Women.

GRACE ARLINGTON OWEN, A. M.,
Teacher of Reading.
CARRIE ALBERTA LYFORD, B. S.,
KITURAH PARSONS,

Teachers of Household Science.

EDITH IRENE ATKIN, A. B.,
Assistant in Mathematics.

HENRY HARRISON RUSSELL, Director of Physical Education for Men.

LILLIAN KEAL SABINE, A. B.,
Teacher of Rhetoric.

LAURA FOWLER HAYES, Ph. M., Teacher of Grammar.

ANNETTA BELLE COOPER, B. Ed., Assistant in Household Art.

> JESSIE ISA LUMMIS, A. B., Teacher of Latin.

CHARLOTTE LOUISE REICHMANN, A. M., Teacher of German.

> MERTON JOSEPH LYON, Assistant in Manual Training.

ANNA ELIZABETH SWAINSON, B. S., Teacher of Design.

JANET GRACE CATION, Director of Household Art.

MABEL CLAIRE STARK, S. B., Assistant in Geografy.

EDGAR PACKARD.

Director of Country School Department.

HAROLD FRANCIS JAMES, Director of Art.

ARTHUR ROWLAND WILLIAMS, A. B., Director of Commercial Department.

EDNA FLORENCE COITH, B. S., Assistant in Household Science.

MINERVA COOK HALL, Assistant in Music.

LYDIA CLARK,

Assistant in Gymnastics for Women.

FACULTY (Continued)

RALPH W. PRINGLE, A. M.,
Principal of the High School.
CLARA MAUD PENSTONE, Ph. B.,
FRANCES MILTON MOREHOUSE, A. B.,
THOMAS M. BARGER, B. S.,

Teachers in the High School.

GEORGE NEWTON CADE,
Principal of the Training School.

AGNES GROVES STORIE, B. S.,
Training Teacher, Eighth Grade.

LORA MARY DEXHEIMER,
Training Teacher, Sixth Grade.

MARY EVANGELINE ROBB,
Training Teacher, Fifth Grade.

JESSIE MAY DILLON, Training Teacher, Fourth Grade.

IDELLA RETTENA BERRY, B. S., Training Teacher, Third Grade. LURA MARY EYESTONE, B. S., Training Teacher, Second Grade.

NELLIE CATHERINE THOMPSON,
Training Teacher, First Grade.

MARGARET E. LEE.

Director of the Kindergarten.

CONSTANCE SMITH,
Assistant in the Kindergarten.

THOMAS BILLINGS, Gardener.

ANGELINE VERNON MILNER, Librarian.

LILLIAN HAVENHILL, A. B., GERTRUDE ANDREWS.

EDNA KELLY, Assistant Librarians.

FLORA PENNELL DODGE,

LOTTIE LAVONNE HAYES, Stenografers.

ZONA BELLE McDOWELL, Clerk and Registrar.

Extra Teachers Employd for Summer Session.

LOUIS AUGUSTUS PECHSTEIN, A. B., B. S. HARRY AMBROSE PERRIN, Education.

HARLEY JONES VAN CLEAVE, A. M.,
RUTH MARSHALL, Ph. D.,
CYRUS WILLIAM LANTZ, A. M.,
HARRY DWIGHT WAGGONER, A. B.,
RALPH HARLAN LINKINS, A. M.,
Biology.

GEORGE SYPE, A. M.,

ROY WILKIN WITHROW, B. S.,

GEORGE DOUGLAS MOUNCE, B. S.,
Physical Science.

HENRY HUGH EDMUNDS,
WILLIAM WRIGHT McCULLOCH.

MARTHA HUNT.

WILLIAM HAWKES, A. B.,

RALPH RAYMOND KIMMELL,

ISAAC NEWTON WARNER, B. S., DANIEL HANNON.

Mathematics.

CORA PRYOR.

Stenografy.

ANTHONETTE DURANT, A. B.,
JOHN ALEXANDER GEHLMAN. B. S..

RUTH ELLEN MOORE, A. B., English Grammar.

HARRY LATHROP, B. E.,

HARRY M. CLEM, M. S., Geografy.

WILLIAM GEORGE BATE, A. B., JOHN ARTHUR STRONG, B. Ed.,

FLORENCE BULLOCK, A. B., History and Civics.

SUSAN ELMA WILCOX, B. S.,

MABEL ELIZABETH FLETCHER,

ESSIE CHAMBERLAIN, Ph. B., Literature.

> BINNEY GUNNISON, Public Speaking.

NAANA LYNN FORBES, Reading.

MARTIN FRANCIS GLEASON,

LAURA VAN PAPPELENDAM,
Art Instruction.

RUTH VIRGINIA SIMPSON,

FAYE HESTER,

Household Science,

GUNA KELLEY, Music.

FACULTY COMMITTEES

Alumni-Mr. Pricer, Miss Penstone, Miss Cooper.

Athletics-Mr. Russell, Mr. Holmes, Mr. Lvon.

Auditing-Mr. Adams, Miss Atkin, Mr. Cavins.

Bildings-Mr. Newell, Mr. James, Miss Ela, Mr. Cade.

Bulletins and Printing-Mr. Holmes, Miss Sabine, Mr. Peterson.

Campus-Mr. Madden, Mr. Pricer, Miss Patterson.

Christian Work-Miss Atkin, Mr. Adams, Miss Barton, Miss Dillon.

Course of Study-Mr. Manchester, Mr. Howe, Miss Colby.

Disciplin-Mr. Manchester, Mr. Russell, Miss Barton, Miss Colby, Mr. Howe.

Entertainments-Mr. Ridgley, Miss Atkin, Miss Stark,

Faculty Club Programs-Mr. Newell.

Faculty Receptions—Miss Thompson, Miss Parsons, Miss Cation, Mr. Howe.

General Exercises—Miss Hayes, Miss Sabine, Miss Hall, Miss Berry, Miss Owen.

Graduating Exercises—Miss Ela, Mr. Adams, Mr. Lyon, Miss Owen. Lecture Association—Mr. Evans. Mr. Westhoff, Mr. Peterson.

Library—Mr. Schroeder, Mr. McGill, Miss Colby, Mr. Ridgley, Miss Penstone.

Music-Mr. Westhoff, Miss Hall, Mr. Williams.

Oratorical Association—Mr. Sanford, Mr. Beyer, Mr. Lyon, Mr. McGill.

Parents' Meetings-Miss Eyestone, Miss Robb, Miss Lee.

Playground—Miss Smith, Mr. Cade, Miss Clark.

Publicity-Mr. Ridgley, Mr. Williams, Miss Stark.

Reception of New Students—Mr. Westhoff, Miss Hayes, Miss Penstone, Miss Cation.

Records—Mr. Cavins, Mr. Turner, Miss Hayes.

Recommendations-Mr. Turner, Mr. Holmes, Miss Eyestone.

Social Life-Miss Lummis, Miss Swainson, Miss Coith,

Student Activities-Mr. Adams, Mr. Howe, Miss Clark.

Student Loan Fund-Mr. Cavins, Mr. Barger, Miss Williams.

Student Programs—Mr. Manchester, Miss Colby, Mr. Holmes, Mr. Howe, Mr. Beyer, Mr. Peterson.

Student Publications—Miss Sabine, Mr. Beyer, Miss Morehouse.

Student Welfare—Miss Barton, Mr. Cavins, Mr. Russell, Miss Cummings.

Teachers College—Mr. Pricer, Miss Colby, Mr. Holmes, Mr. Ridgley, Mr. Beyer, Mr. Schroeder.

Training School—Mr. Turner, Miss Dexheimer, Mr. Howe, Miss Berry.

Philadelphian Society—Miss Stark, Mr. Cavins, Mr. Westhoff.

Wrightonian Society-Mr. Beyer, Mr. Cade, Miss Hall.

Ciceronian Society—Mr. McGill, Mr. Madden, Mr. Barger.

Girls' Debating Club—Miss Lummis, Miss Atkin, Miss Reichmann. Country Life Club—Mr. Packard. Mr. Madden. Miss Patterson.

The President is ex-officio a member of all committees.

HISTORICAL SKETCH

THE ILLINOIS STATE NORMAL UNIVERSITY was establisht by the General Assembly February 18, 1857, to prepare teachers for the public schools of Illinois. The School was opend October 5, 1857, in Major's Hall in Bloomington with three teachers and nineteen students. It was the first state normal school in the Mississippi Valley. In 1860 the school was removed to its new quarters, then the finest normal school bilding in the United States. This structure had been erected at a cost of \$120,000, of which \$65,000 was paid by the state. The city of Bloomington and county of McLean had contributed in lands and money \$141,000.

In 1889 a separate heating plant was erected, a training school bilding in 1891, a library and gymnasium in 1896, a plant house in 1905, a manual arts bilding and auditorium in 1909, a new bilding to house the Training School and the University High School in 1913. The present value of the bildings, grounds, and equipment is not less than \$650.000.

For fifty-three years the state normal school has been doing the work for which it was establisht. Of its twenty-four thousand students nearly all have taught some time in the schools of Illinois. Its graduates are to be found in almost every state from Boston to the Golden Gate. Many have attaind the highest eminence in educational work. The yearly demand for teachers who hav received their training in this school is much larger than can be supplied.

From 1860 until 1895 a high school was maintaind as a department of the Model School. Its thoro instruction in the ancient languages won high reputation. In 1906 the high school was restored, but its chief emfasis is now laid upon modern science, agriculture, commerce and the manual arts. In 1908 was establisht a Teachers College with four-year courses leading to a professional degree.

The Normal University has expanded with the growth of the public school system. While normal schools are not the exclusiv agency for the training of teachers, yet they are the state's chief agents, and as such they must bild up the professional spirit, establish the standards, create the ideals, send out the men and women whose call is to educational leadership.

The ordinary income of the institution has now reacht \$145,000. Its regular faculty numbers fifty-six teachers. Its annual enrollment 2509 students, besides 254 in the high school and 481 in the model school. Its courses of study hav multiplied to meet the varying needs of students, and to train special teachers of art, music, household science, manual training, agriculture, and commercial branches.

LOCATION

The Normal University is located at Normal, a town of 4000 inhabitants at the intersection of the Chicago & Alton and Illinois Central Railroads. The situation is helthful, the site high and well draind; the town is provided with excellent water, sewers, paved streets, gas, and electric lights. Commodious homes and boarding houses for 800 students stand within easy walking distance of the school. Normal is a very desirable place of residence for people who value educational advantages. The charter provides that intoxicating liquors shall never be sold within the limits of the town. An electric railway, with cars every ten minutes, connects Normal with Bloomington, two miles to the south.

HOW TO REACH NORMAL

The Illinois Central and the Chicago & Alton are the only railroads in Normal. Whenever it is possible, students on other lines should buy their tickets and check their baggage thru to Normal. Students coming to Bloomington on the Big Four or Lake Erie & Western are advized to check their baggage to the Chicago & Alton Junction in Bloomington; they may then leave the train at this station and recheck their baggage to Normal at a cost of six cents, the price of a ticket to Normal.

Students coming to Bloomington on the limited trains of the Chicago & Alton, the Big Four, the Lake Erie & Western, or the interurban lines of the Illinois Traction System may reach Normal by street cars. These run from all railroad stations to the Court House square, whence a transfer may be taken to the Park Street or Fell Avenue cars, which run to the Normal University.

The fee for delivering baggage from Normal station is twenty-five cents; from Bloomington fifty to seventy-five cents. Baggage should bear a card with the owner's name and address.

BILDINGS AND EQUIPMENT

The Main Eilding, an imposing edifis 100x160 feet, surmounted by a clock tower, contains the main offises and reception rooms, the study hall, the society halls, and sixteen class rooms.

The Gymnasium Bilding, 100x125 feet, constructed of Bedford limestone, contains on the first floor the gymnasium, baths, and dressing rooms; on the second floor rooms for the commercial department; on the third floor the biological laboratories and museum.

The Library Bilding is a substantial brick structure, 80x96 feet. It contains rooms for the department of geografy, and a lecture room, besides the various rooms used for library purposes. The handsome reading room. airy, well-lighted, and convenient, occupies the entire second floor.

The Manual Arts Bilding contains a modern auditorium with seating for 1115 persons, a science lecture room, three laboratories for chemistry and physics, four rooms for domestic economy, three for the art department, and six for manual training, besides offises and storerooms. This bilding is provided with ample equipment for the preparation of special teachers of these branches.

The new Thomas Metcalf Bilding contains a high school assembly room 48x72 feet, with five high-school class rooms, eight schoolrooms and eight class rooms for the elementary school, a kindergarten 28x70, laboratories for agriculture and natural science, four rooms for domestic science, twelv offises, play rooms and rest rooms. It is a model bilding in all its hygienic and sanitary arrangements.

The physical and chemical laboratories are supplied with modern equipment and a good stock of apparatus adapted to the needs of advanst students.

The psychological laboratory is provided with an abundance of appliances for experiment and demonstration.

The department of biology, because of the former location here of the State Museum of Natural History, has at its disposal a working collection of zoological and botanical material much larger than that found at similar institutions. The laboratories are equipt with forty-eight compound microscopes of modern type, and apparatus for the preparation of permanent microscopic mounts of plant and animal tissues. The equipment for human physiology is exceptionally ample. The greenhouses are a valuable asset in connection with the work in botany, and new apparatus for experiments in plant life is used here by students preparing to teach botany in higher schools. An ample supply of field glasses is provided for bird study.

The geografical equipment includes relief models of the United States and Europe, a complete set of Sydow-Habenicht relief maps, charts of the United States topografic, coast and geodetic surveys, a collection of rocks, minerals and other specimens, meteorological instruments, numerous exhibits illustrating industrial topics, and a large collection of pictures relating to this subject, including several thousand stereografs and stereopticon slides.

A school garden of two and one-fourth acres, and a spacious greenhouse in care of an experienced gardener, afford excellent facilities for experiment and instruction in horticulture and floriculture. The Normal University farm of ninety-five acres is used for demonstration and experiment in connection with the courses in agriculture. It is stockt with thorobred horses, swine, poultry, and a dairy herd.

The manual training shops are supplied with lathes, jointer, planer, band saw, circular saws, all driven by electric motors, and an abundant equipment of minor tools for wood and metal working.

The well-shaded campus of fifty-six acres contains over one hundred species of trees and shrubs. Its open spaces afford abundant room for tennis and other athletic sports.

There is a valuable reference and circulating library of 29,000 bound volumes and 24,000 pamflets. The books have been carefully selected and indext and now constitute a fairly complete working library in every department.

The library is open eleven hours of every school day and four hours on Saturdays and during vacations. The librarian gives instruction in the use of the library in a set of ten practical lessons. It is the aim of the teachers and librarian to help students to the use of books, and to give them the best assistance in doing their reference work.

The library is supplied with the leading American periodicals.

STUDENT ORGANIZATIONS

LITERARY SOCIETIES

There are seven literary societies connected with the school—the Philadelphian, the Wrightonian, the Ciceronian, the Girls' Debating Club and three junior societies in the University High School. These afford practis in oratory, debate, dramatics, and parliamentary usage. The societies have well-furnisht rooms set aside for their use.

CHRISTIAN ORGANIZATIONS

New students will receiv a harty welcome to the Young Men's and Young Women's Christian Associations of the Normal School. These organizations ar vigorous and activ, and endevor to promote the spiritual welfare of the students.

ORATORICAL ASSOCIATION

The purpose of this association is the cultivation of oratory, declamation and debate. The winners of the annual contest in oratory and declamation receiv the Richard Edwards medals, establisht in honor of the second president of the institution. The successful contestant in oratory represents this institution in the contest held in March of each year under the direction of the State Leag of Normal Schools. This association conducts also annual debates with the State Normal schools at Oshkosh and Terre Haute.

THE ATHLETIC ASSOCIATION

This organization has general control of students' athletics in conjunction with the director of the gymnasium.

THE LECTURE ASSOCIATION

Three members of the faculty, four students, the pastors of the various churches in Normal and the city superintendent of schools constitute a lecture board, to provide a course of highclass lectures and concerts at low cost. The activ management of the course is in the hands of the student members.

MUSICAL ORGANIZATIONS

THE UNIVERSITY CHORAL CLUB.—This organization meets twice each week at 6:15. The club gives three concerts each year, singing selections from standard operas, oratorios and cantatas.

GLEE CLUBS.—Four ar organized, two for men, two for women. The Orchestra.—It is the purpose of this organization to give students who play upon an instrument an opportunity for practis in concerted playing. Rehersals ar held regularly and such music as is suitable for the social functions of the school is prepared.

THE BAND.—The Normal University Band numbers about twenty-five members. Daily instruction is given by the teachers of music upon the band and orchestral instruments.

The music organizations ar under the direction of the teachers of music.

OTHER ORGANIZATIONS

THE DRAMATIC CLUB (The Jesters) was founded in 1909. Its players ar drawn from the entire student body, and the casting of characters is determind by the Directors from work done in class, on special programs, and from numbers given at the Literary Societies.

THE SCIENCE CLUB holds bi-weekly meetings, at which papers ar red dealing with scientific questions.

THE NATURE STUDY CLUB discusses ways and means of extending and popularizing the nature-study movement.

THE COUNTRY LIFE CLUB devotes its weekly meetings to the consideration of topics relating to the improvement of country life thru the leadership or co-operation of the country school.

STUDENT PUBLICATIONS

The Vidette is a 16-page weekly, fild with local news, alumni notes and practical and interesting matter on school topics contributed by faculty and students. It is under the management of the Vidette Board, elected by the students of the various classes.

The INDEX, publisht annually by the senior class, contains detaild information in regard to the various student organizations.

The ALUMNI QUARTERLY is a 32-page magazine intended to keep alumni in touch with the life of the institution.

ORGANIZATION

The Illinois State Normal University comprizes four schools:

The Normal School,

The Teachers College,

The Elementary Training School,

The University High School.

The Normal School is intended to prepare teachers for graded elementary schools, rural schools, and village schools. It provides for high-school graduates programs two years in length for primary teachers, for upper-grade teachers, and for special teachers of art, manual training, household science, household art, agriculture, commercial branches, public school music, and the kindergarten. One-year and two-year programs ar provided to prepare country-school teachers, and a preparatory program for mature students who wish to make up deficiencies in high-school work.

The Teachers College is intended to prepare high-school teachers, supervizors, principals, and superintendents whose duties require a more extended preparation than the normal-school course. It provides full four-year programs beyond the high school, leading to the professional degree, Bachelor of Education.

The Elementary Training School consists of a kindergarten and eight grades. It is intended to serv as a model school for observation and training for students of the Normal School and Teachers College.

The University High School is provided primarily for holders of township scholarships who ar too young to enter the Normal School, or who do not intend to prepare for teaching. Additional students are admitted on payment of tuition. It is a school of observation and training for students in the Teachers College. The attendance is limited to 230.

CONDITIONS OF ADMISSION TO THE NORMAL SCHOOL

Students ar admitted to the Normal School upon presentation of the following evidences of scholarship:

- 1. A high-school diploma.
- 2. A teacher's certificate.
- 3. A certificate of attendance at another state normal school.
- 4. A township scholarship under the Lindly Act. This act provides for an annual examination in each township adapted to graduates of the eighth grade. The candidate making the highest average in his township is awarded by the State Superintendent of Public Instruction a scholarship good for four years at any state normal school in Illinois.
- 5. A county diploma or certificate of graduation from the eighth grade.
- 6. A statement from proper school authorities showing that one or more years of high-school work has been completed.

Persons not provided with the foregoing credentials may arrange for admission by correspondence with the president. In doutful cases an examination in the common branches will be given by the faculty. This examination is held on the first day of the term.

Young men to enter the normal school must be at least seventeen years of age; young women sixteen. Students not of the required age ar assignd to the grammar school or high school until they reach the maturity desired.

To obtain free tuition, students who ar not holders of township scholarships ar required to sign a declaration of their intention to devote themselvs to teaching in the public schools of Illinois for as long a period as they attend the Normal School.

Students may enter at any time, provided they ar competent to take up the work then in progress. It is best to enter at the beginning of a term. In all but the special programs classes ar provided each term for students beginning the course of study.

CREDIT FOR WORK IN OTHER INSTITUTIONS

For all work done in other state normal schools and in the University of Illinois, credit is given so far as such work is equivalent to our own courses. Credit for work done in other higher institutions is granted upon adequate proof that such work is a satisfactory substitute for courses offerd here. No student is expected to mark time by repeating work well done elsewhere.

SPECIAL STUDENTS

Teachers of maturity and experience may be admitted as special students, and ar permitted to take up any work for which they ar prepared. They may not, however, be permitted to teach in the training school until they have had preliminary courses in general pedagogy.

ENROLMEN'T

The first day of each term, except the summer terms, is devoted to the enrolment of new students, to the examination of students for advanst standing, or to complete the work of the preceding term. New students should be present in the morning to present their credentials, to register in the offis, to pay their term fees, to consult with the appropriate committee in regard to their program of studies, to enrol with the director of the gymnasium, and to consult with teachers in regard to their studies, so far as may be desirable. Students may enrol on the Saturday preceding the beginning of the term.

Students arriving in Normal on the first day of the term or the preceding Saturday will be met at the railroad station or street car by students wearing red badges, who will assist the new comers in finding suitable boarding places.

Students arriving at other times ar advized to come directly to the offis of the president.

ACCREDITED HIGH SCHOOLS.

Graduates of high schools with four-year courses accredited to the University of Illinois ar admitted to the Teachers College, or to any of the two-year programs (A to J) in the Normal School provided that the fifteen units of entrance credit that they offer include the following:

Algebra 1	unit
Geometry 1	unit
Physics 1	unit
	unit
Zoology	unit
	unit
	unit
	unit
History (General, Ancient, Medieval, English	
or American)	units
Literature and English Composition 3	
Total	units

The remaining five units may be composed of any subjects that the high school accepts to meet its graduating requirements.

The work above stated is the minimum in each branch. It is expected that each student shall have done more work in some of the subjects.

Graduates of accredited high schools who have not completed all the work listed above may take two of the omitted half units in the regular classes in these subjects (see Program P, p. 40) as substitutes for two stard subjects in their regular program. If the student is deficient in more than two half-units of the list, he shall add these subjects to the requirements of his regular program.

Graduates of non-accredited high schools with full fouryear courses ar admitted on the same terms, and may continue in the program chosen, provided that they maintain in their various studies a general average of not less than seventy-five per cent. If they fall below this average in any term, they shall in the next term take such additional courses as may be arranged with the Dean.

If high-school graduates admitted to the Normal University are not able to write well with ease and speed, or read distinctly with good expression, extra courses in reading and penmanship must be taken by them soon after entering.

A unit is the amount of work done in a preparatory subject in 180 recitation periods of forty minutes each, or the equivalent in laboratory or other practis.

EXAMINATIONS FOR ADVANST STANDING

To students pursuing any of the programs outlined on pages 23-41 an opportunity is given to pass by examination any study in the program without taking the same in class. The regular time for such examination is the first Monday of each term. If this date is not convenient, arrangement for a suitable date may be made with the instructor.

EXPENSES

Tuition is free to all qualified students of the required age who ar preparing to teach in the schools of Illinois. A registration fee of two dollars per term is charged all students except those holding township scholarships under the provision of the Lindly act. For each summer term of six weeks the fee is one dollar. Students from other states than Illinois and students not preparing to teach are charged an additional tuition fee of ten dollars per term for the long terms. If within five years such student from another state teaches an equivalent time in Illinois, the tuition is refunded. An incidental fee of \$1.25 per term is charged to maintain certain student organizations.

Good furnisht rooms, large enuf for two persons, rent at from \$2.00 to \$3.00 per week. Table board in private families may be had at \$3.50 per week. Good rooms and excellent boarding places ar abundant. Arrangements can be made better after arriving in Normal than by letter.

Students not living at home are required to room at approved houses. A list of approved rooming houses is kept at the offis of the President of the University. A written contract is required strictly defining the terms on which rooms ar rented.

The Normal University does not sell or rent text-books. The total cost of books and stationery need not excede fifteen dollars per year. Students are advized to bring with them such books as they may have, but not to purchase others until they arrive in Normal.

AID TO STUDENTS

To assist worthy students in completing their course of study the Alumni and Faculty have created a Students' Loan Fund, from which students in their senior year may borrow at a low rate of interest a sum not to excede one hundred and fifty dollars.

Provision is made upon the Normal University farm for housing and boarding a small group of students of agriculture. These will be afforded regular employment a few hours each day at good wages. Application may be made by mail.

Many students secure employment which enables them to meet their expenses. For such employment address Mr. E. W. Cavins or Miss Lillian Barton. Students should consult them before entering into any agreement with an employer.

TEACHERS' BUREAU

Thoroly traind teachers ar in demand in all the best schools of Illinois. Many boards of education will employ no others. There is a rapidly increasing demand upon the normal schools for such teachers. To meet this demand more effectivly the Illinois State Normal University maintains a teachers' bureau, whose purposes ar to secure for its students, free of cost, suitable positions, and to aid school officers in selecting efficient teachers. Students, as a rule, do not expect employment without a personal visit; it is hoped that the expense of such visit may be avoided unless there is some prospect of employment.

GRADUATION

Candidates for graduation shall, at the beginning of the year in September, file with the President the program of studies they desire to follow during the senior year. This program must accord with the general daily programs for the various terms and the rules stated on pages 42, 43. If the student desires to make substitutions not provided for by the general rules, his request must be approved by the proper committee of the faculty.

Candidates for graduation may enrol in the senior class at the beginning of the winter term provided they lack of graduation fewer than twelv credits.

No person may receiv the diploma of this institution unless he has completed a full year (42 credits) of resident work. All candidates for graduation shall write an acceptable thesis upon some educational theme. The subject shall be reported to the hed of the proper department at the opening of the Fall term. The thesis shall be completed and handed in at the beginning of the Spring term.

Students who lack no more than two credits of completing the course of study may participate in the Commencement functions in June and receiv their diplomas upon the completion of their work in the ensuing Summer term.

Candidates for graduation should see that all conditions and deficiencies ar removed by the end of the eighth week of the Spring term.

ADVANST STANDING AT THE UNIVERSITY OF ILLINOIS.

Graduates of this institution ar regularly admitted to junior standing in the University of Illinois. Students who wish to prepare for teaching in such city high schools as require university graduation of their teachers, if alredy qualified to enter the freshman class at the university, may profitably spend the first two years in the careful professional training that the Normal School affords.

THE SUMMER SESSION

The Normal School provides two summer terms of six weeks each for activ teachers and for students who wish to continue their studies during the summer. The programs consist chiefly of the regular courses in the various subjects. The daily program is so arranged that the student recites twice per day in the same subject, thus completing a regular twelv-week course in six weeks. The primary and grammar grades of the training school ar in session, affording model lessons for observation and discussion and opportunity for practis teaching. Especial prominence is given to music, drawing, construction work, modeling, manual training, and the household arts, to the natural sciences. to the common branches as outlined in the Illinois State Course of Study, and to the special courses required in the examination for state teachers' certificates. Credit is given for all satisfactory work and recorded on the book of the institution. A special summer-school announcement is issued in March.

The large attendance of the summer school (1878 in the summer of 1914) makes it possible to provide excursions, concerts, lectures and other forms of instruction and entertainment scarcely possible at institutions of limited attendance or less fortunately adapted to summer study.

A similar mid-spring term will begin May 1, 1916.

PROGRAMS OF STUDY

The Normal School requires for its courses a good degree of maturity and scholarship, quite as much as that attaind by graduates of our best high schools with four-year courses. Accordingly the standard two-year programs of the Normal School ar pland for students of such preparation. Besides the standard programs other programs ar regularly taught to supply the needs of that large body of students whose preparation is not up to the standard named above. In the standard program twenty-six credits ar required for graduation. By a "credit" is ment the amount of work done in a given subject requiring daily preparation in a term of twelv weeks by a typical student carrying four studies and reciting five times per week in each. To complete the required program the attendance required of the typical student is six regular terms of twelv weeks and one summer term of six weeks.

The regular programs of study are:

A. A two-year program (26 credits) to prepare teachers of upper grades.

B. A two-year program for teachers of lower grades.

C. A two-year kindergarten-primary program for teachers of the kindergarten and of the first two primary grades.

- D-J. Two-year programs to prepare special teachers of Music, Manual Training, Art and Design, Household Art, Domestic Science, Agriculture, and Commercial branches.
- K. A four-year Teachers College program to prepare highschool teachers, principals, supervisors and superintendents.

Graduates of four-year high schools who hav the specific preparation, set forth on page 17 and other students of equal preparation ar admitted to the foregoing programs without condition.

Mature students whose preparation falls below the equivalent of four years of high-school work and who wish to enter upon any of the foregoing programs may arrange with the president or dean to take from the preparatory program, (program P on p. 41), such courses as ar needed to complete the entrance requirements. All such students must, before graduation, be credited with fifteen units of entrance credit, in addition to the regular credits of the program selected.

- L. A three-year program for students who hav had the equivalent of three years of high-school work. This leads to the same normal-school diploma as programs A to J.
- M. A one-year program for students who hav completed the tenth grade and wish to engage in teaching country schools after a year's study.
- N. A similar two-year program for graduates of the eighth grade.

Students who complete M or N ar recommended for third-grade teachers' certificates under the new certificating law.

O. A three-year program to follow program M for students who expect to secure the regular normal-school diploma. Students who hav completed program N may continue with program O, but must take, before graduating, enuf additional work for program P to make a total of fifteen units of entrance credit and twenty-six term-credits of normal-school work.

Students who hav completed programs M or N and wish to secure the diploma from any of the programs, C to K, should arrange with the President or Dean for the additional work to be taken from program P.

P. A preparatory program, three years or less in length, to enable mature students to supply the deficiencies in their high-school preparation.

Holders of first-grade teachers' certificates originally granted before July 1, 1914, with partial high-school preparation, may enter program L. They may, however, be required to take additional courses in English, History, or other branches according to the deficiency of their high-school preparation.

Holders of second-grade teachers' certificates who have taught two years may enter upon program L on the same terms.

Other holders of second-grade certifiates and holders of third-grade certificates who hav taught one year may be admitted to section M or section P.

Students are designated by the program they are pursuing as belonging to Section C, Section D, etc. The year in the program in which most of their work lies is designated by an exponent as A^1 , A^2 , etc.

TEACHERS' CERTIFICATES

It is the duty of the Illinois State Normal University to prepare every kind of teacher required for the public schools of Illinois.

The needs of the schools ar set forth in the new law of 1913, governing Teachers' Certificates. These certificates may be issued to candidates who hav past the examinations prescribed by the State Examining Board, or to those who hav done a required amount of work in "recognized" normal schools or other higher institutions.

Accordingly the State Normal University provides the specific programs required for the various kinds of certificates.

Graduates from programs A to L and from program O ar entitled to receiv a first-grade county elementary certificate good for three years and renewable indefinitly.

Students who hav completed the work of the junior year in any of these programs may receiv the second-grade county elementary certificate.

Students completing programs M or N may receiv a third-grade county elementary certificate.

The six-week courses required for renewal of these certificates are offerd in the mid-spring term and the two summer terms.

The Kindergarten Primary certificate, good for two years and renewable indefinitly, may be obtaind by completing program C.

Special certificates, good for two years and renewable indefinitly, may be obtaind after completing programs D to J in Music, Art, Manual Training, Domestic Science, Domestic Art, Agriculture and Commercial branches.

County high-school certificates, good for three years and renewable indefinitly, may be obtaind after completing two or more years of the Teachers College program.

County Supervizors' certificates may be obtaind only by examination in English, educational psychology, the history of education, and school administration. The Normal University offers extended and thoro courses in these subjects.

State Elementary certificates and State High-School certificates are issued to teachers of due preparation and long experience in teaching who pass an examination in English, educational psychology, and principles and methods of teaching. The State Normal University offers adequate courses in these subjects in both the regular and summer terms.

For the State Supervizors' certificate is required graduation from a normal school and an examination in English, educational psychology, sociology, the history of education, and school management, administration, and supervizion.

THE TEACHERS COLLEGE

The purpose of the Teachers College is to afford adequate professional preparation for high-school teachers, principals, superintendents, and special teachers. Its programs provide for two years' work in the Junior College, two years in the Senior College.

High-school graduates having the special preparation set forth on page 17 are admitted to the Junior College and a program of study four years in length. (50 credits.)

Students in the Normal School may transfer to the Junior College if they hav completed fifteen units of work of secondary grade.

Normal-School graduates ar admitted to the Senior College and to a program two years in length. (24 credits.)

College graduates ar admitted to the Senior College and to a special professional program one year in length. (14 credits, eight of them in education and teaching.)

All students completing the prescribed program receiv the degree of Bachelor of Education.

Students completing the program of the Junior College may receiv the normal-school diploma, if their credits include five terms in education and two terms of teaching with a grade not lower than 80.

The program of the Teachers College is largely electiv. The electiv courses fall into three lists, designated A, B, and C.

First-year students may select from List A.

Second-year students may select from List A or List B.

Students in the Senior College must select two of their four courses from List C, the others may be chosen from List A or List B. No course in List C may be taken unless its prerequisits in the Junior College hav been completed. College graduates may choose their electivs from any list, or from the normal-school programs approved by the president. Two of the three terms in practis teaching listed in the Senior College may be taken in the second year. One must be taken in the last year.

Students in the Teachers College ar required to elect some major subject in which they ar to make at least nine credits. The student is expected to take also such other courses related to his major as ar prescribed by the hed of the department in which the major lies. As a rule the elective chosen should run thru the year.

Students in the Teachers College ar subject to the same general requirements relating to platform speaking, physical training, attendance at general exercizes, and general decorum as apply to normal-school students.

Students admitted to the Teachers College who ar found deficient in writing, spelling, composition or oral expression ar required to take a special course in such subject during the second term.

TEACHERS COLLEGE PROGRAM

150 Weeks-50 Credits

The required studies in pedagogy scheduled for the second year may be deferd until the third year.

Two substitutes may be taken for stard courses to make up conditions. See page 17.

	School Management	Economics 2
Teaching	Teaching	Teaching

Stard subjects ar electiv. It is expected that in the first year and in the summer term students from section M will arrange to take the elective previously omitted from program M. One term of Geografy is required.

Students from Section N ar required to take before graduation enuf additional courses from program P to make a total of fifteen units of entrance credit, and twenty-six normal-school credits.

Students from Section M and N who wish to take up any of the special programs A-K should take from program P preparatory courses as arranged with the Dean.

PROGRAM P

THE PREPARATORY PROGRAM

The preparatory program is intended for students old enuf to enter the normal school, who, because of their maturity and diligence, ar able to complete the equivalent of a high-school course in less than four school years.

It is not intended for students who expect to engage in teaching after one or two years' attendance in the normal school. Such students should take programs M or N.

It is recommended for mature students who wish to take the special programs A to K but lack the high-school preparation required.

Experienst teachers who wish to begin at once upon any of the programs A to K may arrange with the President or Dean to select part of their work from the preparatory program, part of it from the special program.

Preparatory credit is reckond in *units*, a unit being the equivalent of 36 weeks of high-school work with daily recitations requiring preparation. The numerals after the various term courses indicate the fraction of a unit coverd by the term's work.

Students of the required age who hav completed the eighth grade and hav had no high-school work must complete fifteen units of preparatory work. Students who hav completed a partial high-school course, may, in consultation with the President or Dean, select from the preparatory program the units to be taken to complete the fifteen.

The stard courses ar electiv. Each student is required to take one stard subject each term in addition to the required subjects at the top of the list.

Public speaking is required daily for one term, weekly thruout the entire program. The total credit allowd is one unit.

Holders of second-grade teachers' certificates without highschool work to their credit may shorten this program by passing an examination in such subjects as they ar prepared to pass.

Holders of second-grade certificates who hav taught two years ar allowd one-half unit of preparatory credit for each subject coverd by the certificate, but no such credit may be allowd in subjects where high-school credit is presented.

Holders of first-grade teachers' certificates originally granted before July 1, 1914, may make similar arrangements for the completion of the preparatory program.

RULES RELATING TO STUDIES AND CONDUCT

1. Every new student is expected at the beginning to choose one of the various programs of study and to follow this program as closely as is practicable except where electiv substitutes ar specifically allowd.

2. Variations from the regular program chosen ar permitted to special students, and to others if there be special need of such change. All individual programs involving substitutions

must be approved by the President or the Dean.

3. Students who hav become irregular in their programs or who contemplate taking elective should study carefully the daily programs on pages 48-52. All irregular programs should be approved by one of the faculty committee on student programs (page 9).

4. No substitution may be allowd for the common branches unless the student gives satisfactory evidence of proficiency in such branches. In doutful cases an examination may be required.

5. No substitution for any of the natural sciences may be allowd unless the student's previous study in the omitted branch is equal to the requirements for admission as shown on page 17.

- 6. Elective may be chosen from any of the programs on p. 22-37 provided the student is qualified to pursue the subject with profit. This permission may be granted by the President or Dean. Elective chosen from program P must be of half-credit value if substituted in programs A to L.
- 7. The electivs allowd include five years' work in Latin, three years' work in German, and courses in method for students who hav alredy attaind considerable proficiency in these languages. For the first year's work in Latin or German one credit is allowd, for the second year two credits, for all work beyond the second year and for the courses in method full credit.
- 8. No elective credit is allowed for a single term in cooking or sewing; for two terms one credit is given; for three terms three credits.
- 9. No credit is allowd for less than one hundred twenty hours of bench work.
- 10. All classes recite daily in the regular terms. In the summer terms of six weeks two recitations per day ar held in most subjects, thus enabling the student to complete the regular twely-week courses.
- 11. Four hours per week of gymnasium practis is required of all first-year students. Students who cannot profitably take this work because of age or physical disability may substitute electivs. Ten library lessons ar given each term to entering students.
- 12. Thirty minutes per day ar devoted at General Exercises to the consideration of topics of interest to prospectiv teachers.

All members of the school ar expected to aftend. One day per week the school at this hour is divided into small sections for practis in platform speaking. All students ar required to participate in this work.

13. Every student is expected to take not more than four major subjects (or their equivalent), nor less than three, not counting physical training. Students whose standing in all subjects is above 80 may take a hevier program, with the approval of the Dean. A program of less than fifteen hours may be taken only by special permission.

14. If a student fails to keep pace with his class in any study he may be transferd to a lower section in such study or be re-

quired to drop the study.

15. If a student fails to carry a study after continuing thru half the term he is required to repeat the study at the earliest opportunity.

16. If a student fails to complete a course in which his work is of good quality, he should complete such course in the next term in which he is in attendance and the course offerd. Otherwise the entire course is to be repeated at the earliest opportunity.

17. A student who fails in any term to make a passing grade in two major studies, or their equivalent, is placed upon probation for the succeding term, and in case he fails to carry two majors in the succeding term, he shall not be permitted to continue his studies until one year has elapst. This rule may be suspended in the case of any student by a majority vote of the faculty.

18. Other students may be placed upon probation by the faculty or by the Committee on Disciplin. Such probation shall not excede one term. Students on probation may not take part in any public contest or exhibition, athletic, musical, dramatic, or

oratorical.

MISCELLANEOUS

Term fees and tuition ar to be paid the first day of the term. If the student leaves school within two weeks (one week in summer), fees ar refunded. If a student paying tuition leaves school during the first half of the term, half of the tuition is refunded.

Students ar enrold in their classes upon presentation of their term-fee or tuition receipt, or evidence that they hold township

scholarships.

Grades for scholarship indicate as follows: Above 90, distinguisht proficiency; 86-90, excellent; 81-85, good; 76-80, average; 70-75, fair work below the average; below 70 indicates poor work and the student must repeat the course.

Students ar expected, whenever it is possible, to enter school at the beginning of the term and remain to the close, to attend their classes regularly, and to conform to the various requirements that hav been found necessary to the orderly and successful working of the institution and to the welfare of its students.

THE UNIVERSITY HIGH SCHOOL

The act of the State Legislature creating Township Scholarships in the state normal schools for the benefit of graduates of the eighth grade obliges these institutions to provide academic courses for such holders of these scholarships as do not intend to become teachers, and also for such as ar looking to teaching but ar still too young to enter upon the regular normal-school programs.

Accordingly this institution has re-establish tthe high school that was discontinued in 1895.

Tuition is free to all holders of township scholarships.

Other students of suitable age, character, and preparation may be admitted upon payment of tuition at the rate of twelv dollars per term, or four dollars per study where partial work is taken. Attendance is limited to 230.

The high-school students ar seated in a separate study hall in charge of a principal and three teachers, who devote their entire time to the instruction and care of these high-school students and to the supervision of their work. In some subjects, they recite with the regular normal-school students. In most subjects they recite in separate classes, in which the character and quantity of the work is specifically adapted to their needs.

On pages 45-47 five programs of study ar outlined; one with Latin and German for such students as expect to enter college, another designd especially for girls, giving a large place to household economy, a commercial program, a manual training program, an agricultural program. Physical training and music must be taken at some time during the first three years. Monthly rhetorical exercises ar required of all students.

It is the intention to develop this department into a model high-school. While the value of liberal culture and the demands of citizenship will receiv due recognition in the arrangement of its courses, it is proposed to meet the growing demand that the high-school course shall prove directly servisable in preparing for high efficiency in useful occupations. Accordingly there ar arranged five chief programs, each four years in length, differing in the prominence given to particular groups of studies, and looking respectivly toward the speaking and writing professions, medicin and agriculture, engineering and the bilding trades, commerce, and the household arts.

Holders of township scholarships and others who contemplate entering the University High School ar requested to register as early as is possible. Registration may be by mail.

A special bulletin describing the University High School will be furnisht upon application.

The Agricultural Science in the foregoing program is in strict accordance with the program for agricultural high schools recommended by the Illinois Educational Commission.

It is expected that the strictly agricultural work shall occupy about one-fourth of the time of the student, and that it shall be taught from a vocational standpoint to prospectiv or probable farmers

Practically the entire range of farm affairs is coverd by this course, and it is believe that a good basis will be establisht for intelligent reading by the young farmer. The Normal University farm is not used for experiment to discover new agricultural truth, but for demonstration of good farming methods, of the effects of good fertilizers and rotations, of proper selection and treatment of seed, of modes of cultivation, of the proper care of live stock, and other details of farm practis. With the facilities and equipment at the command of the State Normal University, it is believe that the proper material, curriculum, and method of an agricultural high school can be workt out.

The other studies in the agricultural program ar chosen with regard to their value to the farmer-citizen. They comprise natural science, government, and such studies in English as will lead to fair skill in the use of the mother tung and to an appreciation of the best literature.

STATEMENT OF COURSES IN DEPARTMENTS

EDUCATION

COURSE ONE

THE TEACHING PROCESS

The major topics of this course ar (1) the larger social meaning of the public school, and the aims of teaching; (2) the choice of teaching as a vocation and qualifications for the work; (3) organization of the school, and the daily program; (4) the course of study, and how the teacher can make the best use of it; (5) the lesson and the lerning process, including the problem of pupils' study; (6) organization of lessons; (7) observation studies in the Training School; (8) the problems of school government and disciplin; (9) supervizion and the teacher.

This course, or its equivalent, is required of all candidates for the Normal-School diploma. It is offerd in fall, winter, spring, and both summer terms.

The text, Colgrove's *The Teacher and The School*, is supplemented by Strayer's *The Teaching Process* and other library readings.

COURSE TWO

ELEMENTS OF PSYCHOLOGY

The primary purpose of this course is to lern the conditions, processes and laws of mental development. Thus is laid the foundation for intelligent attack upon the problems of teaching. After an analysis of adult human behavior, that of children and youth will be studied. In addition to the five recitation periods two laboratory periods per week of the same length ar required. The hours for laboratory work ar arranged by consultation with the instructor. Prerequisit: a knowledge of the structure and functions of the nervous system equal to what is included in Biology 4 and 9. All terms.

Texts: Pillsbury's Essentials of Psychology, Kirkpatrick's Fundamentals of Child Study.

COURSE THREE

GENERAL METHOD

The aim of this course is to derive methods of instruction from an examination of educational aims, materials and psychological principles. The order of development is as follows: Aim of education; materials of education; mental processes involved in lerning; interest, incentive and motiv; forms of instruction—induction and deduction; method in habit-formation; method in the formation of worthy ideals and prejudises; review of organization of subject-matter, and effective devices. All terms.

Texts: Charter's Methods of Teaching, McMurry's Method of the Recitation.

COURSE FOUR

- 1. SCHOOL ORGANIZATION, SUPERVIZION AND MANAGEMENT
- (a) The nature of institutional life in general. (b) The fundamental law of the school. (c) The logical evolution of the school thru its fundamental law. (d) The school at work under the law of its constitution. (e) The social and ethical training in the working of the school. (f) A detaild discussion of the problems of school supervizion. Text-books: Tompkins's Philosophy of School Management, Dresslar's School Hygiene.
- 2. THE SCHOOL SYSTEM OF ILLINOIS. Its historical development, its defects. School law as embodied in statutes and judicial decisions. All terms.

COURSE FIVE

PRINCIPLES OF EDUCATION

A study of fundamental principles underlying educational activities. Leading topics: educational aims, the individual and society, the sources of human conduct, heredity and environment, modifiability of conduct thru educational agencies, educational values of the studies and of other school agencies.

Texts: Ruediger's *Principles of Education*, Schroeder's *Psychology of Conduct*, supplemented by library readings. Winter, spring, and first summer terms.

COURSE SIX

HISTORY OF EDUCATION

An elementary course covering the period from the Renaissance to the present. The main European and American influences which hav formd our present theories of education and school systems, elementary and secondary, ar studied, and in this connection selections from the educational writings of Comenius, Locke, Rousseau, Pestalozzi, Froebel, Herbert Spencer and Horace Mann ar red. Fall term, first summer term.

COURSE SEVEN

THE PEDAGOGY OF ADOLESCENCE

This is a junior college course and may be taken in place of Education One by prospectiv high-school teachers who ar candidates for the degree of Bachelor of Education. It deals with the educational problems of adolescence: (1) the transition from later childhood and elementary education to youth and secondary education; (2) physical, mental and social characteristics of adolescents; (3) needs and instinctiv interests of this period; (4) the high-school course of study as determind by present needs and social outlook; (5) the problems of social life, athletics, organizations; (6) study and discussion of actual teaching problems in the University High School; (7) high-school administration and management. Winter and spring terms.

Prerequisits: graduation from a four-year accredited high school, or its equivalent, and Elementary Psychology.

Text: Johnston and others.

SENIOR COLLEGE COURSES

THE HISTORY OF EDUCATION

Chief purposes and values.—These courses aim (1) to make an interpretation of history in terms of man's conscious, rational effort to improve the total conditions of life and realize the higher human ideals by means of education; (2) more specifically to trace the origin and development of educational ideals and processes in their relation to dominant life-problems; (3) to form more accurate standards of evaluation and practical judgment concerning present educational conditions; (4) to get inspiration and motiv from the lives of persons who hav made eminent contributions to the solution of the human problem in the field of education.

COURSE EIGHT

ANCIENT AND MEDIEVAL EDUCATION

Of ancient education main emfasis is put upon that of the Greeks and the Romans. The education that resulted from the ideals of the early Christians and the medieval churchmen is traced thru the monastic era and the age of scholasticism. The beginning of the secularization of education is studied in the training of feudal chivalry and in the rise of the universities. Fall term.

Prerequisits: good courses in ancient and medieval history.

Textbooks: the first and second volumes of Graves's History of Education. Monroe's Sourse Book, Painter's Great Pedagogical Essays, and other library references ar used for source reading.

COURSE NINE

MODERN EUROPEAN EDUCATION

The Renaissance, the Reformation and the beginnings of the realistic movement ar studied to find their educational import in the transition of the modern era of science, democracy and the new humanism. The leading educational theorists and reformers ar studied in relation to education in both Europe and America. Present tendencies ar examind and interpreted as attempts to solv national problems and promote the attainment of the changing ideals of human progress. Winter term.

Prerequisits: good courses in modern European history. Textbooks: the second volume of Graves's History of Education, and Parker's History of Modern Elementary Education.

COURSE TEN

EDUCATION IN THE UNITED STATES

A genetic study of American education is made under the following main divisions: (1) transplanted forms of European education found in the Colonial period; (2) early American education as found in voluntary enterprizes and in the beginnings of free state systems before 1860; (3) the development of public education since 1860; (4) the present education situation in its relation to the life of the people and national character. The history of special lines of educational advance is noted in the study of special topics; e. g., "vocational education," "science in the curriculum," etc. Spring term.

Textbooks: Dexter's Education in the United States, and Thwing's Education in the United States Since the Civil War.

COURSE ELEVEN

EDUCATIONAL PSYCHOLOGY. FIRST HALF.

Courses 10 and 11 together form a detaild study of the psychological aspect of some of the main educational problems. They also give teachers, principals, and superintendents training in attacking experimentally problems in methods of teaching, in testing the senses and lerning abilities of children, and in reading the literature of the subject. In the fall term the topics ar mental inheritance; correlation of abilities; theories of interest; types of lerning and habits; difficulties in the formation of habits and how to overcome them; the relations of feeling and emotion to education; conditions affecting retention; experimental studies of methods of teaching spelling, writing, and arithmetic. These courses prepare for the State Examination in Educational Psychology. Two hours of laboratory work a week in addition to the five recitations, the former to be arranged by consultation.

Prerequisit: Course 2. Fall term.

Texts: Colvin's The Lerning Process, and Watt's Economy and Training of Memory.

COURSE TWELV

EDUCATIONAL PSYCHOLOGY, SECOND HALF.

A continuation of Course 10, by which it should be preceded, if possible. The principal topics ar: imagination in relation to education; the transfer of training; mental fatig; school tests of efficiency (sight, hearing, color perception, lerning and memory, generalizing, attention, the Binet tests). Laboratory arrangements, the same as in Course 10. Winter term.

Texts: Colvin's The Lerning Process, and Whipple's Manual

of Mental and Physical Tests. (Second Edition, 1914.)

COURSE THIRTEEN

ETHICS AND THE EVOLUTION OF MORALITY

The factors, processes, and main lines of moral development among the Greeks, the Hebrews, and in modern times ar studied. Ethical theories ar considerd and evaluated as factors in modern history. Typical fases of present moral situations analyzed and hypothetical solutions thought out. How the school, as one of the co-operativ agencies in the creation and maintenance of ethical ideals and moral standards, can most effectively do its part is quite fully considerd. Concrete problems for study ar found in daily incidents in school and out. Spring term, 1916.

Prerequisits: good courses in the social sciences—history, sociology, economics, and politics. Offerd in the spring term of even-numberd years to alternate with Course Fourteen.

Textbook: Dewey and Tufts' Ethics.

COURSE FOURTEEN

SOCIAL ETHICS

This course is an interpretation, or evaluation, of characteristic movements and events in American history in their bearing upon the liberation and direction of the energies of the people and the emancipation of the human spirit in accordance with the laws of economy, justis, and social redemption. It considers the ethical import of present tendencies to legislation, economic reform, and social betterment. It examins the ethics of leading vocations, such as business, the law, engineering, bilding, speculativ enterprizes, parenthood. It includes also a consideration of the ethical significance of household and municipal sanitation, personal helth, and social hygiene. Spring term, 1915.

Prerequisits: see Course Thirteen.

Such books as Hadley's Standards of Public Morality, Addams' Democracy and Social Ethics will be used as the literary basis of study.

COURSE FIFTEEN

SCHOOL ADMINISTRATION

FALL TERM: The function of the national government, the state and local units of administration, the financing of the school, the school plant, the superintendent and the teaching staff, the problems of supervizion, the evolution of the course o fstudy, the administration of supplementary and special education.

WINTER TERM: The application of scientific methods in determining the efficiency of a school system, the interpretation of school statistics, school records, school reports, school surveys.

Spring Term: Problems of high-school administration. Curriculum, equipment, class organization, technique of method and of management, social activities, six-year and four-year programs, the relation of the elementary school and to the college, brief comparative study of foren secondary schools.

Texts: Dutton and Snedden's Administration of Public Education in the United States, Strayer and Thorndike's Educational Administration, McMurry's Elementary School Standards, Brown's The American High School, Johnston's The Modern High School, supplemented by extensiv library reading.

MATHEMATICS

ARITHMETIC

COURSE ONE

Method in Arithmetic for the First Six School Years $(12~{\bf W}{\tt EEKS})$

The Purpose.—To arrive at the logical order of number knowledge, to derive its processes from simple counting, and to develop and illustrate the principles and methods of instruction in the primary and intermediate grades, with observation and analysis of work in the Training School. The Illinois State Course of Study forms the basis of the work. Text: Cook and Cropsey.

This course is required of all students. Graduates of approved high schools need take no other course. Students with partial high-school courses or with some experience in teaching grammar grades should take as prerequisit Course 2. Students without high-school training or its equivalent should take as preparatories Courses 3 and 4, instead of Course 2. All terms.

COURSE TWO

MENSURATION AND PERCENTAGE

This course is a combination of Courses 3 and 4, six weeks each, and is intended for more mature and advanst students. It consists of a rapid review of the essentials of those courses as well as the emfasizing of the important points as to methods and results. The principal topics of the seventh and eighth years' work of the State Course of Study ar included. All terms.

Texts: For Mensuration, Felmley's Eighth Year Arithmetic. For Percentage, Thurston's Business Arithmetic.

COURSE THREE

MENSURATION

The purpose of this course is to arrive experimentally at modes of mesuring areas and volumes, to obtain the laws of similar figures, to inform the student as to conditions that obtain in carpeting, papering, plastering, the mesure of land, lumber, brick and concrete work, as well as hights and distances, and the application of the Pythagorean proposition.

In volumes the study pertains to the rectangular solids, the cylinder, pyramid, cone and sfere—with many practical problems in each drawn from various industries. In the country-school courses an effort is made to draw the problems largely from the farm and country. All the topics in the eighth-year work of the State Course of Study ar included. All terms.

Text: Felmley's Eighth Year Arithmetic.

COURSE FOUR

PERCENTAGE AND BUSINESS ABITHMETIC

As a foundation for the course and relations of percentage to fractions and decimals ar discust and a thoro study is made of the three type-forms of problems. The main part of the work is a consideration of the applications of percentage in profit and loss, commission, commercial discount, interest, banking, exchange, stocks and bonds, taxation and insurance, with special emfasis upon the usages of the commercial world. All terms.

Text: Thurston's Business Arithmetic.

COURSE FIVE (Twelv Weeks)

ARITHMETIC REVIEW

This course is designd as a review of the fundamental operations, factoring, common and decimal fractions, and denominate numbers. It is necessary groundwork for all the other courses in Arithmetic. Students who do not hav an accurate and redy knowledge of the above-named topics take this course as a prerequisit to all other mathematical courses. Fall and winter terms.

Text: Hamilton's Complete Arithmetic.

BOOKKEEPING

COURSE ONE (Six Weeks)

This course has for its aim to prepare teachers for the work in bookkeeping outlined in the State Course of Study.

From a study and comparison of a number of individual accounts—cash, merchandize and personal—the principles of debit and credit ar derived. These principles ar then applied to the handling of six or more sets of accounts, beginning with the simplest and including some which require some knowledge of notes and drafts and their use in a system of money exchanges. In connection with the study of a set of accounts, the purpose and form of the day-book and journal, and their combination in the explanatory journal, ar lernd. Most of this work is done in the class. Outside of the class pupils use *The Sadler-Rowe Budget System*, which teaches how to prepare many kinds of business papers, as well as how to keep the journal and ledger. Work in the budget is completed to page 53. In the fall and spring terms a longer course is taught. Fall, winter, spring, first summer terms.

ALGEBRA

The function, scope and logical order of Algebra, its relation to arithmetic, its notation and fundamental ideas. Principles ar derived inductivly from concrete problems, and afterwards by rigorous deduction from definition. An attempt is made to teach pupils to think clearly and to appreciate the validity of conclusions drawn from given data. Especial attention is paid to the language of algebra, to describing and relating algebraic processes, and to the mode of developing the more difficult topics. Some attention is paid to the principles of the equivalency of equations and systems of equations, and the methods of solution ar based on the proofs of these principles. The graf is used to illustrate the meaning of the equations. The work includes quadratics, series, and logarithms, and is offerd in three forms. An additional electiv course is offerd in College Algebra.

COURSE ONE

TAYLOR'S ELEMENTS OF ALGEBRA

Prerequisit: a strong high-school course in Algebra equal to the requirement of the best colleges. Spring term.

COURSE TWO

TAYLOR'S ELEMENTS OF ALGEBRA, CHAPTER I-XV

Positiv and negativ numbers, the fundamental operations of integral literal expressions, factoring, highest common factor and lowest common multiple, fractions and fractional equations, systems of linear equations. Fall, spring, and first summer terms.

COURSE THREE

CHAPTERS XVI-XXXIII

Evolution, surds, imaginary and complex number, quadratics, irrational equations, higher equations, inequalities, proportion, theory of exponents, series, binominal theorem and logarithms. Fall, winter and both summer terms.

Courses 2 and 3 ar for students who hav had only a partial course in algebra. Together they count as the equal of Course 1.

COURSE FOUR

TAYLOR'S ELEMENTS OF ALGEBRA, CHAPTERS I-X

Positiv and negativ numbers. The fundamental operations in integral literal expressions, linear equations in one unknown, factoring. Fall and spring terms.

COURSE FIVE

CHAPTERS XI-XX

Highest common factor and lowest common multiple, fractions and fractional equations, systems of linear equations, evolution, irrational numbers and surds, imaginary and complex numbers, quadratics in one unknown. Winter term.

COURSE SIX

CHAPTERS XXI-XXXIII

Irrational equations, higher equations, inequalities, theory of exponents, indeterminate equations, series, binominal theorem and logarithms. Spring term.

Courses 4, 5 and 6 ar for mature students who hav not studied algebra. They count as the equivalent of Course 1.

COURSES SEVEN, EIGHT, NINE

These ar preparatory courses running thru the year and intended for young students who hav not studied algebra. They count as the equivalent of Courses 4 and 5.

GEOMETRY

These courses cover the ordinary high-school work in plane, solid, and sferical geometry. An attempt is made to teach the subjects so that the student will realize the value and meaning of its principles. The logic of geometry is approacht by gradual steps and the first few propositions ar developt syllogistically. In this way the habit and form of reasoning ar establisht. The student is expected to work his way relying on his own power of reasoning, and not on mere memory work. More than one-third of the time is devoted to original demonstrations. Free use is made of supplemental problems and propositions. Considerable attention is given to theorems and notions of fundamental importance in the structure of the subject as well as to those of practical utility. Historical notes ar not omitted and modern developments of the subject reciev some attention. Three main ends ar kept in view. To acquire the essential facts of the subject as properties of space in which we live, to equip the student with the forms of deductiv reasoning, and to make the study a drill in precise thinking and accurate, perspicuous expression.

Course 1 is for students that hav had previously strong courses in geometry. Students due in one term only should take Course 2 unless they hav previously completed a thoro course in solid geometry. Courses 3, 4 and 5 ar for students who hav not had geometry. All of plane geometry is required of all students. Text: Wentworth-Smith.

COURSE ONE

Fundamental conceptions and definitions, theorems in parallels, equality of triangles, parallelograms, the circle, proportion, similar figures, area of polygons, regular polygons. This is a review of plane geometry. Fall, winter, and first summer terms.

COURSE TWO

Lines and planes in space, diedral and polyedral angles and polyedrons. The cylinder, cone and sfere. All of solid geometry. Winter, spring and second summer terms.

COURSE THREE

Fundamental conceptions and definitions, theorems in parallels, equality of triangles, parallelograms, the circle, proportion, and a part of the work on similar figures. This course covers two and one-half books of plane geometry. Fall term, and first summer term.

COURSE FOUR

This course completes plane geometry. Spring term and second summer term.

COURSE FIVE

This course covers the whole of solid and sferical geometry. It is the same as course 2 above. Spring and first summer terms.

COURSE SIX

ALGEBRA AND GEOMETRY METHOD

This course is designd for the prospectiv teachers of high-school mathematics. It includes a study of the aims in teaching algebra and geometry, their place in the high-school curriculum, the subject matter to be offerd, the methods of presentation and the history of important topics. The text-book work is supplemented by the reading and discussion of reports, addresses, magazine articles and other books dealing with the present tendencies in the teaching of mathematics. Spring term and first summer term

Texts: Smith's Teaching of Geometry and Young's Teaching of Mathematics.

ELEMENTARY ASTRONOMY

This course is intended to give students such an insight into the organization of the solar system and the problems of astronomy as will enable them to read an almanac and teach mathematical geografy intelligently. As far as possible, numerical facts ar derived mathematically from the original data. A good deal of observation work is required. Wider reading on assignd topics is also a feature of the work. Winter term.

Text: Howe's Elements.

TEACHERS COLLEGE COURESS

COLLEGE ALGEBRA

This course covers the following topics: Undetermind coefficients, the binomial theorem, logarithms, exponential and logarithmic series, permutations and combinations, probabilities, continued fractions, the summation of series, the general theory of equations, the solution of higher equations and the elements of determinants. Prerequisit: Course 1, 3 or 6. Fall term. Text: College Algebra, Rietz and Crathorne.

TRIGONOMETRY

This course includes the theory of trigonometry both in the plane and on the sfere, as well as the ordinary application in surveying and astronomy. Prerequisit: Plane and solid geometry, algebra. Winter term only. Text: Phillips and Strong, with tables.

ANALYTICAL GEOMETRY

Thic course covers the ordinary analytical methods of investigation, the general properties of conics, and a brief course in the analytical geometry of three dimensions. Prerequisit: Trigonometry and algebra. Spring term only. Text: Ashton.

PHYSICS

COURSE ONE

ELEMENTS OF PHYSICAL SCIENCE

The purpose of this course is three-fold. 1. To lead the student into the habit of observing and studying carefully the elements of physical science as applied to every-day life. 2. To equip him for efficient work in the teaching of nature study in the physical world in the graded and ungraded schools. 3. To furnish him with clearer conceptions of those physical principles which underlie the study of geografy, physiology, botany, and zoology.

All students who hav not taken a course in physics ar required to take this course as a prerequisit to all work in geografy or biological science.

The course covers in a simple way but with much experimental work the following topics: Elementary meteorology with daily non-instrumental observation thruout the term and instrumental observation for one month, the physical principles involved in such wether study; study of lighting systems of the past and present; study of heating systems of the past and present; study of primitiv water supply and present systems for home supply; soil physics; ventilation; sanitation of home and school surroundings.

The experiment work deals with evaporation, condensation, air weight, air pressure, air currents, temperature mesurements, combustion and oxidation, diffusion of heat, composition (solid and volatil matter) of common fuels, distillation of crude petroleum, etc. About one-half of the experimental work is done by the class and the rest as demonstrations. Very complete and systematic notes ar required and both subject matter and form and composition ar daily criticized by the teacher.

In general, the work of this course is largely determind by

In general, the work of this course is largely determind by the phenomena which daily confront the student. Winter term.

Text-book: General Science, Clark.

COURSES TWO AND THREE

Physics for grade teachers. (7 hours per week). Course 2 given in the fall term and both summer terms; Course 3 given in the spring term and both summer terms.

This is a two-term course in physics for elementary teachers. The application of physical principles to daily life in the home and school ar given special attention. The laboratory work is not given as an end in itself but as a means of securing clear conceptions of the principles and phenomena under consideration.

Course two covers the mechanics of solids, liquids, and gases, and heat. Considerable attention is given to the following topics: water supply, sewage disposal, the heating, ventilation, and humidifying of residences and school rooms.

Course 3 covers magnetism, static and current electricity, light, and sound. Special attention is given to modern methods of lighting residences and school rooms.

Prerequisits: Algebra, geometry, and course 1 or its equiva-

Texts: First Course in Physics, Millikan and Gale, and Laboratory Exercizes, Fuller and Brownlee.

COURSES FOUR AND FIVE

Course 4 given in fall and first summer terms; Course 5 in winter and both summer terms.

This is a two-term course in physics for high-school teachers. It is intended for mature students in the normal school and for students in the junior college who ar preparing to teach in the high school. The more difficult problems of high-school physics ar given special attention. The students will be expected to use logarithms in the solution of problems. The technique of high-school laboratory management receivs due attention.

Course 4 covers mechanics of solids, liquids, and gases, molecular physics and heat.

Course 5 covers magnetism, static and current electricity, sound, light, and radio-activity.

Prerequisits: A working knowledge of algebra including logarithms, geometry, and some previous work in physics.

Texts: Practical Physics, Black and Davis, and Laboratory Exercizes, Fuller and Brownlee.

COURSE SIX

METHOD IN PHYSICAL SCIENCE FOR THE ELEMENTARY SCHOOLS

This course in physical science is for graduates of four-year high schools who hav taken accredited courses in physics and chemistry. The purpose of the course is to bild up a course in nature study in the physical world. It contemplates the following ends:

- (a) The discovery of the pedagogical basis for the study of physical science in the school.
- (b) The consideration of a course of study involving the physical sciences in their relation to daily life.
- (c) Occasional observation of work in the Training School. Prerequisit: High school physics and chemistry. Winter and spring terms.

Text-book: The Elements of Physical Science, Barber.

TEACHERS COLLEGE GOURSES

SENIOR COLLEGE

In the following courses emfasis is placed upon the application of the principles in life as well as upon an academic treatment of the principles themselvs. It is intended that these courses shall produce resourceful high-school teachers, therefore every effort is made to keep fairly close to high-school methods and high-school materials.

COURSE SEVEN

APPLIED MECHANICS

(3 hours per week recitation, 4 hours per week laboratory work). Spring term.

This is a Junior College course. It covers applied mechanics, a brief study of the trigonometric functions and a use of trigonometric tables.

Prerequisits: Physics 4 and 5 or equivalent.

Texts: Elementary Practical Mechanics, Jameson, and Exercizes in Mechanics, Jameson. Essentials of Physics, Hering, will be used as a reference in all college courses in physics.

COURSE EIGHT

MAGNETISM AND ELECTRICITY

(3 hours per week recitation, 4 hours per week laboratory work, counting as 5 hours. Fall term.

Prerequisit: Physics 4 and 5 or equivalent.

Texts: Elements of Electricity for Technical Students, Timbie; and Laboratory Manual, Direct and Alternating Currents, Clewell.

COURSE NINE

LIGHT AND SOUND

(3 hours per week recitation, 4 hours per week laboratory work, counting as 5 hours.) Winter term.

Prerequisit: Physics 4 and 5 or equivalent.

Texts: Handbook of Acoustics, Harris, and Essentials of Physics, Hering.

COURSE TEN

НЕАТ

(3 hours per week recitation, 4 hours per week laboratory work, counting as 5 hours.) Spring term.

Prerequisits: Physics 4 and 5 or equivalent and trigonometry. Texts: *Mechanics, Molecular Physics and Heat,* Millikan, and *Heat,* Randall.

COURSE ELEVEN

LABORATORY ASSISTANT

Method in Physics and Chemistry for the high-school. (10 hours per week, counting as 5 hours.) Any term.

This course deals with both the theoretical and the practical questions arising in the management of an elementary course in physics or chemistry. The course contemplates the following ends, on the side of—

- Theory: 1. Purpose of a high-school course in physics or Chemistry.
 - 2. Method of presentation of subject matter.
 - 3. The problem of securing profitable notebook work.
 - 4. The most profitable work in the poorly-equipt laboratory.
- Practis: 1. Designing, making, and testing simple apparatus for the laboratory.
 - 2. Laboratory assistant in Course 2 or 3, or Course 1 or 2 in Chemistry.

Helping to care for notebooks.

Prerequisits: Courses 4 and 5 and Courses 1, 2 and 7 in Chemistry. This course may count as one term of teaching.

Text-book: The Teaching of Physics and Chemistry in Secondary Schools, Smith and Hall.

CHEMISTRY

SELECTION OF COURSES

Candidates for the Normal-School diploma who ar conditiond in Chemistry should take Course 1 during the winter, spring, or first or second summer term. Candidates for the diploma in Household Science should take Courses 1, 2, 3, 4 and 8. Candidates for the diploma in Agriculture should take Courses 1, 2, 3, and 5. Students preparing to teach chemistry in the high schools should take Courses 1, 2, 3, 5, 6, and 7, or 4 and 8 insted of 5 and 6.

COURSES ONE, TWO, AND THREE

General Chemistry. (3 hours per week recitations, 4 hours per week laboratory.) These courses include a year's work in inorganic chemistry of college grade and extend thru the fall, winter, and spring terms. Course 1 is repeated each term, including the two summer terms, and Course 2 is also offerd in the first summer term. Course 1 is required of all candidates for the Normal-School diploma who hav not had a course in high-school chemistry or its equivalent, extending thru at least a half year. The three courses ar required of all candidates for the Domestic Science and Agriculture diplomas irrespectiv of whether a high-school course in chemistry has been taken or not.

Course 1 is the study of the elements hydrogen, oxygen, nitrogen, and carbon and their compounds, of air, of the properties of gases, of solution, of fuels, of the fundamental laws and theories of chemistry, of of chemical calculations. Extensiv application

of chemistry to daily life is made.

Courses 2 and 3 continue the study of the non-metals and metals. Sulfur, the halogens, silicon, boron, fosforus, sodium, potassium, calcium, magnesium, aluminum, iron, copper, mercury, silver, gold, led, tin, manganese, chromium, vanadium, tungsten, zinc, and platinum and their various compounds ar studied. The problem of soil fertility is studied. The salt products industry, the silicate industry, the cement industry, and the iron and steel industry ar studied. Numerous applications of chemistry to the problems of the household ar considerd.

Text: A Course in General Chemistry, McPherson and Hen-

derson.

COURSES FOUR AND EIGHT

Organic Chemistry. (4 hours per week recitations, 2 hours per week laboratory.) Fall and winter terms.

This is a study of the carbon compounds with reference to hydrocarbons, alcohols, organic acids, carbohydrates, fats, proteids, foods, and feeding stuffs, food adulterants, and the chemistry of vital processes. Animal and vegetable textil fibres ar also studied. About one-fifth of the time of the course is devoted to

study of the method of teaching high-school chemistry. The organization, content, and methods of instruction ar considerd. In the laboratory the chemical reactions of fats, carbohydrates, and proteins ar studied and simple digestion experiments ar carried out.

Prerequisit: Courses 1, 2, and 3 or their equivalent.

Texts: Moore's Outlines of Organic Chemistry. Thorp's Outlines of Industrial Chemistry.

COURSE FIVE

Qualitativ Analysis. (9 hours per week laboratory, 1 hour per week recitation.) Fall term.

This course is intended for students who expect to teach chemistry in high schools. It is based on the ionic theory and the mass law and presupposes a knowledge of general chemistry. The course includes the separation and identification of the common metals and acids. Analysis of compounds and mixtures is undertaken, a number of unknown substances being examind.

Prerequisit: Courses 1, 2, and 3 or their equivalent.

Text: Qualitative Analysis, Bailey and Cady. Other works on qualitativ analysis ar consulted frequently.

COURSES SIX AND SEVEN

Quantitativ Analysis. (8 hours per week laboratory, 1 hour per week recitation.) Winter and spring terms.

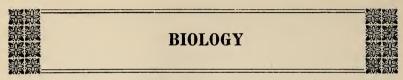

After the student has become familiar with the standard methods of gravimetric and volumetric analysis he applies these methods to the analysis of commercial substances. Agricultural products, including milk, butter, cheese, fertilizers, feeding stuffs, soils, and crop residues ar examind. The analysis and calorimetry of solid and gaseous fuels is undertaken. The sanitary analysis of air and water is done. Students taking advanst work in Domestic Science may undertake the examination of the common foods and reagents of the household.

A course in method of teaching high-school chemistry similar to that given in connection with Courses 4 and 8 above is given in connection with Courses 5, 6 and 7.

Prerequisit: Courses 1, 2, 3 and 5.

Text: Elementary Quantitativ Chemical Analysis, Lincoln and Walton.

The opportunity of practis teaching in chemistry in the University High School is offerd to students who hav the necessary preparation in the science. These high-school classes extend thruout the year.

NATURE STUDY

COURSE ONE

AGRICULTURAL NATURE STUDY—FALL ASPECT

This course is designd especially for students who ar registerd in the programs for country teachers. The work consists of observations and experiments in the laboratory, garden, greenhouse, and campus. Chief topics: Insects, birds, trees, shrubs, fall wild flowers, garden plants, including a detaild study of the parts of a flower, pollination and seed forming, characteristics, habits of growth, and economic value of some common vegetables, propagation by budding, cuttings, and bulbs, a detaild study of wheat and corn, weeds, fungi and fungous diseases.

The course is based largely upon the State Course in Nature-Study Agriculture. It considers material available in country and village districts, methods of manipulation and presentation, including simple experiments, observation field trips, and collections. Notes and drawing ar kept.

Texts: Beginnings of Agriculture, Mann. Lesson Plants in Nature-Study Agriculture. Fall and summer terms.

COURSE TWO

AGRICULTURAL NATURE STUDY—Spring ASPECT

The general plan of this course is the same as in Course 1. Special topics: Grafting, soil with simple experiments in drainage, capillarity, germination tests, planning and planting a small vegetable and flower graden, poultry.

Prerequisit: Course 1.

Text: Same as in Course 2. Spring term.

COURSE THREE

INVERTEBRATE ZOOLOGY

This is a general introductory course in elementary zoology designd to meet, in part, the needs of those who ar preparing to teach zoology in the high school or nature study in the elementary school. Animals from each of the groups of invertebrates which ar represented in our local fauna ar studied with special reference to their economic relations. The work consists of field and laboratory studies of living animals; microscopic study of protozoa; lectures; text and library assignments. Stress is laid on the evidences of evolution and the adaptions of animals to their modes of life. Notes and drawings ar kept. Fall and both summer terms.

Text: Linville and Kelley's Text-book in General Zoology.

1 1 3

COURSE FOUR

VERTERRATE ZOOLOGY

This is a general elementary course in vertebrate zoology designd particularly for those who ar preparing to teach zoology in the high school. It deals with the classification, anatomy, physiology, evolution, and economic relations of vertebrate animals. The work consists of experiments on living animals; dissections; study of museum speciments; field study of birds and other animals, lectures, text and library assignments. Special emfasis is laid on the habits and economic relations of birds and on evolution of the animal kingdom. Notes and drawings ar kept. Winter and first summer terms.

Text: Same as in Course 3.

COURSE FIVE

PHANEROGAMIC BOTANY

This is a general elementary course in botany dealing with the so-cald flowering plants and seed plants. It is designd to meet, in part, the needs of those who are preparing to teach botany in the high school or nature study in the elementary school. It deals with the elements of morfology, physiology, classification, and ecology of seed plants. The work consists of laboratory experiments and observations with notes and drawings, field trips, text and library assignments. Chief topics: The relations of the plant to soil, air, and light; the relations of the flowers to insects; the processes of fotosynthesis, respiration, transpiration, food storage, and digestion. Spring and both summer terms.

Texts: A Text-Book in Botany, Coulter, and Gray's New Manual of Botany.

COURSE SIX

CRYPTOGAMIC BOTANY

This is a general elementary course in botany dealing with the so-cald non-flowering, or seedless, plants. A study is made of representativ lower forms establishing an evolutionary sequence from the algae to the seed plants and the evolution of the plant kingdom is discust. Special emfasis is placed on the economic forms, viz.: the yeasts, molds, bacteria, and parasitic fungi. Numerous experiments are made with cultures of bacteria and simple bacteriological methods ar demonstrated. This course is designd for those preparing to teach botany in the high school. Fall and first summer term.

Texts: A Text-Book of Botany, Coulter, and Bacteria, Yeasts, and Mold in the Home, Conn.

COURSE SEVEN

NATURE-STUDY-MATERIAL AND METHOD

This course is designd for students who ar preparing to teach nature study in the grades. It includes a study of material suited to the various grades, the educational bearings of the subject with extensiv readings, and lesson plans for the different grades. Spring and summer terms.

Text: Practical Nature-Study, Coulter and Patterson.

COURSE EIGHT

PHYSIOLOGY AND HYGIENE

An elementary course for students who hav not studied zoology or physics, but of sufficient extent to qualify for the examination for second-grade elementary certificates. Especial attention is paid to questions of personal hygiene.

Text: Physiology and Hygiene, Fitz.

COURSE NINE

THE HUMAN BODY

The anatomy, physiology, and hygiene of the human body ar considerd from the biological standpoint. The organs and their functions ar considerd together. Free use is made of manikin, skeleton, and many models. One general dissection and a demonstration of the sheep's hart and lungs ar made before the class. Brief microscopic study of the principal tissues is made.

The last two weeks of the term ar given to hygiene and sanitation.

Prerequisits: Elementary physics and zoology. Fall, winter, and spring terms for women only. A winter term class for men only. Summer term classes include both sexes.

Text: Hough and Sedgwick's Human Mechanism.

COURSE TEN

TAXONOMIC BIOLOGY

This course includes a study of the trees and shrubs of the campus and nearby plants of nativ forest; of the birds that may be seen here during the term; of the decorativ plants grown in the school garden, greenhouse and local nurseries; and of the wild flowering plants of the local flora, all largely from the taxonomic point of view. The relativ value, uses, and characteristics of the different trees, shrubs and flowers and the economic relations of birds receiv due attention. There ar over one hun-

dred species of trees and shrubs on the campus and over one hundred species of birds ar quite common in the vicinity during the spring term, and almost every variety of decorativ plant grown in this climate may be found in the school garden, on the campus or in the local nurseries. Familiarity with all these and with the local wild flora constitutes a fund of information which should prove very valuable to the teacher of high-school biology or of nature study.

Birds and plants will be studied on alternate days, so that students who can not take the whole course may take either part of the course as a minor, counting for one-half credit. Spring term.

Texts: Gray's New Manual of Botany and Reed's Land and Song Birds.

COURSE ELEVEN

BIOLOGY METHOD

This course consists of lectures and assignd readings on the method of instruction in biology. It includes the consideration of the educational values of biology, the outlining of courses of study in botany, in zoology and in physiology; the details of laboratory management, the construction of simple apparatus, and the collection and preservation of materials. Five hours per week. Winter term.

Text: Students are askt to buy and read Ganong's *Teaching Botanist*, altho it will not be used as a text.

SENIOR COLLEGE COURSES

COURSE TWELV

GENERAL ZOOLOGY

Three double laboratory periods, one lecture, and one quiz per week. This course extends thruout the year, beginning with the Fall term. 1915.

This is a general college course in zoology, dealing with animals exclusiv of insects. It consists of a more or less intensiv study of certain type forms representing the different groups of animals. The morfology, histology, physiology, ecology, embryology, behavior, and economic relations of animals all receiv consideration. Students ar permitted to make for themselvs permanent microscope slides and to prepare other illustrativ material which will be of use in high-school teaching.

Prerequisit: Zoology 3 and 4. Text: Hegner's College Zoology.

COURSE THIRTEEN

GENERAL ENTOMOLOGY

Three double laboratory periods, 1 lecture, and 1 recitation per week. Field trips on Saturdays. Fall term, 1915.

This is a general introductory course in entomology, dealing with the morfology, physiology, ecology, and classification of insects. The laboratory work consists of dissections of some of the larger insects, of experiments on some of the fases of insect behavior; or life-history studies and of the making of permanent microscope slides of insect organs and tissues. Students ar expected to make collections of insects and to lern how to use keys in classifying them.

Text: Folsom's Entomology.

Prerequisit: Course 3 or equivalent.

COURSE FOURTEEN

ANIMAL EVOLUTION

Five hours per week. Winter term, 1915-16.

In this course the various more or less theoretical fases of biology which do not require laboratory study ar considerd. The doctrin of evolution constitutes the main thred of the course, but especial emfasis is placed on the subjects of heredity and plant and animal breeding. The subject of animal behavior receivs some attention. This course should be of equal value to the student who is studying science for its own sake and to the student in the agricultural course who is seeking principles which hav practical application in his work.

Prerequisit: Courses 3 and 4 or their equivalent.

Text: Jordan and Kellogg's Evolution and Animal Life.

COURSE FIFTEEN

ECONOMIC ENTOMOLOGY

Three double periods, 1 lecture and 1 recitation per week. Spring term, 1916.

This course deals specifically with the insect pests which affect the plants of field, garden, and orchard, and with those which ar responsible for the spred of human and animal diseases. Many of the double periods ar spent in the field studying the insects at work on the plants. Life-history studies ar made and preventiv mesures ar discust. The library is supplied with an abundance of literature on the subject.

Prerequisit: Course 12 or equivalent.

COURSE SIXTEEN

PLANT MORFOLOGY

Two double laboratory periods, 1 lecture, and 1 recitation per week. Fall term, 1916-17, and each alternate year thereafter.

This course consists of a detaild study of representativ types from each of the four great groups of the plant kingdom, all from the morfological point of view. Plants ar selected for study which illustrate all the various methods of reproduction and which constitute a complete evolutionary series. The laboratory work includes some training in historical methods and the students ar allowd to prepare for themselvs permanent miscroscopic slides of such material studied as will be of value to a high-school teacher.

Text: Text-Book of Botany, Coulter, Barnes and Cowles, Vol. I.

Prerequisit: Courses 5 and 6 or equivalent.

COURSE SEVENTEEN

PLANT PHYSIOLOGY

Three double laboratory periods, 1 lecture, and 1 recitation per week. Winter term.

This course consists of a detaild study of the various physiological processes of plants, such as nutrition, growth, and movement. The plant cell as the unit of function is studied in much detail and the influence of external stimuli on plants and the relation of plants to soil and other environmental conditions ar topics which receiv attention. Permission is given the students to make for themselvs permanent microscopic slides showing sections of the principal organs of the typical higher plants.

Prerequisit: Courses 5 and 6 or their equivalent.

Text: Text-Book of Botany, Coulter, Barnes and Cowles, Vol. I.

COURSE EIGHTEEN

PLANT ECOLOGY

Three double periods for laboratory and field work, 1 lecture, and 1 quiz per week. Some field work on Saturdays. Spring term, 1917.

In this course a study of the influence of environmental factors on plant structures and plant distribution forms the basis of the work. The more important factors which control plant growth and development ar considerd and many applications of the principles discoverd in this study ar made to agricultural practises. The course includes field work and the solving of simple ecological problems by the different members of the class.

Prerequisit: Courses 15 and 16 or equivalent.

Text: Text-Book of Botany, Coulter, Barnes and Cowles, Vol. II.

COURSE NINETEEN

PLANT PATHOLOGY

Three double laboratory periods, 1 lecture, and 1 quiz per week. Some field work on Saturdays. Fall term and first half of Winter term, 1915-16.

This course consists of a study of the more important plant diseases which are caused by fungi, bacteria, and slime molds. During the early weeks of the fall term a large part of the time is spent in making collections of diseased plants and plant organs. The rest of the time is spent in lerning to identify the different diseases, in making culture studies of the parasitic organisms, in the making of permanent microscopic slides of diseased plant tissues, and in the consideration of preventiv and curativ mesures.

Text: Duggar's *Plant Diseases*. Prerequisit: Botany 5 and 6.

COURSE TWENTY

GENERAL BACTERIOLOGY

Three double laboratory periods, 1 lecture, and 1 quiz per week. Last half of winter term and spring term, 1916.

This is a general laboratory course in bacteriology. Bacteria ar considerd in their relations to soil fertility, to food preservation and to animal diseases, including human diseases. Culture studies of some typical forms ar made and the general technique of the subject is masterd. The work includes the making of permanent microscope slides which become the property of the students.

Text: Jordan's General Bacteriology.

Prerequisit: Botany 5 and 6.

COURSE TWENTY-ONE

NATURE-STUDY SUPERVISION

A course for superintendents and supervisors of nature study. It includes a survey of nature-study material, observation of nature-study lessons in the training school, practis in conducting classroom and field work, discussion of the present problems in nature study with plans for their solution. Fall term.

COURSE TWENTY-TWO

NATURE-STUDY ORGANIZATION

This course follows Course 5. It deals with the winter aspect of nature-study material, trees, birds, etc., physical and chemical phenomena that may be used in elementary grades, arranging a course in nature study. Winter term.

COURSE TWENTY-THREE

SCHOOL AND HOME GARDENS

Work in practical gardening, with experiments, methods of managing and directing children's gardens, the relation of gardening to other fases of nature study, supervizion of class gardens and inspection of home gardens of the children. Spring term.

COURSE TWENTY-FOUR

GENERAL BACTERIOLOGY

A study of the true bacteria, yeasts, molds, and pathogenic protozoa—a course intended for the general scientific student, the student of domestic science, hygiene, sanitation and agriculture. Two hours per week lecture or recitation and six hours laboratory work.

Jordan's General Bacteriology, or Buchanan's Household Bacteriology will be used as reference. Fall term,

COURSE TWENTY-FIVE

THE NUTRITIV PROCESS

An advanst course in physiology dealing especially with digestion and nutrition, and required of all students graduating in domestic science.

Prerequisits ar Chemistry 1, 2, 3, 4 and Zoology 3. Winter term.

COURSE TWENTY-SIX

SANITATION AND PUBLIC HYGIENE

A systematic application of chemistry, physiology, and bacteriology to modern helth problems. Recommended to students who ar to graduate in domestic science.

Prerequisits: Biology 9 or 24, 25, Chemistry 1, 2, 3, 4. Spring term.

GEOGRAFY

COURSE ONE

ELEMENTARY PHYSIOGRAFY

The earth as a planet, the atmosfere, the ocean, the land. Field lessons, excursions, wether observations, simple experiments, study of topografic maps, etc., give concreteness to the work.

This course or its equivalent is prerequisit to all other courses in the department.

Texts: Salisbury's Modern Geografy, Physiografy Note-Book, Four Pamflets on Important Topics in Geografy.

COURSE TWO

HUMAN GEOGRAFY

Influence of natural conditions on the development of the occupations of man. Topografy and climatic conditions of the earth; vegetation zones as determind by natural conditions; relation to human activity. Typical regions studied; general application to all regions of similar conditions. The course deals mainly with those topics given under the topical outline for the study of a continent in the fifth and seventh years of the State Course of Study.

For students following the two-year or three-year program. Texts: Herbertson's Man and His Work; Dryer's High-school Geografy; Bartholomew's Economic Atlas. Four Pamflets on Important topics in Geografy. (6 weeks.)

COURSE THREE

GENERAL GEOGRAFY OF THE WORLD

Covers essentially the same ground as Course 2, with a larger selection of typical regions and more extensiv library reading.

Texts: Same as Course 2. (12 weeks.)

COURSE FOUR

GEOGRAFY OF NORTH AMERICA

Introductory study of the continent as a whole: Detaild study of the United States by physiografic and industrial regions; briefer study of other countries of North America. Natural conditions as influencing industrial development considerd thruout the course. Extensiv library reading required. Deals with topics of State Course of Study pertaining to North America in the fifth and sixth years.

Texts: National Geografy Monografs No. 3. Tarr and Mc-Murry's New Complete Geografy, Second Book. Carpenter's North America. (12 weeks.)

Courses 4, 5, or 6 may be chosen by students to complete the work of geografy in any of the regular programs.

COURSE FIVE

PRIMARY GEOGRAFY

An examination of the course of study for all grades, with especial attention to subject matter and method for third, fourth, and fifth grades; local field lessons and observation of lessons in training school.

Texts: Dodge's The Teaching of Geografy in the Elementary Schools; Dodge's Course of Study in Geografy in the Horace Mann School; State Course of Study; Course of Study in Training School; Four Pamflets on Important Topics in Geografy.

COURSE SIX

COMMERCIAL GEOGRAFY

Conditions both natural and artificial favoring commercial development; Study centerd about commodities of wide use, as food, clothing, shelter, etc. Commodities of importance in the United States given fullest treatment. Most important commodities of each continent considerd. Causal idea in geografy prominent thruout course. Extensiv library reading required. Deals with industrial topics of the fifth, seventh, and eighth years of State Course of Study.

Texts: Robinson's Commercial Geografy, Bartholomew's Economic Atlas. (12 weeks.)

COURSE SEVEN

GEOGRAFY OF SOUTH AMERICA

This course develops a method of continental study as required in seventh and eighth years' work of the State Course of Study. South America servs admirably as a type continent to work out a geografic sequence,—position, surface, climate, life, industry, and commerce. A regional study of South America is made on the basis of physiografic division.

Texts: Bowman's South America; Bartholomew's Economic Atlas.

COUNTRY SCHOOL COURSES

COURSE NINE

ELEMENTARY PHYSICAL GEOGRAFY

This is similar to Course 1, but the work will be adapted to the teaching of Fourth Year Geografy as outlined in the State Course of Study.

Texts: Salisbury's Modern Geografy; Four Pamflets on Important Topics in Geografy.

COURSE TEN

GEOGRAFY METHOD FOR COUNTRY SCHOOL

A thoro analysis of the State Course of Study; material and methods for developing the State Course; emfasis to be placed on the portions of the course to be taught during the next school year fall term.

Texts: Tarr and McMurry's New Second Book; Four Pamflets on Important Topics in Geografy; Bartholomew's Atlas; Herbertson's Man and His Work.

SENIOR COLLEGE COURSES

Senior college courses in geografy ar open to students who hav completed the required work of the previous courses, or any of these courses may be sustituted for Courses 4, 5, 6, or 7, by permission of the geografy teachers. Courses 11, 12, 13, will be taught in 1916-17; Courses 14, 15, 16 in 1915-16.

COURSE ELEVEN

GEOGRAFY OF EUROPE

An introductory study of Eurasia as a land mass, with more detaild consideration of the physiografy, climate, vegetation, and people of Europe. A regional study of the continent, dealing with leading countries, their relation to each other, to the United States, and to the rest of the world. Special topics for library study.

Texts: Mill's International Geografy, (library copies), Bartholomew's Atlas. (12 weeks.)

COURSE TWELV

METHOD IN GEOGRAFY

Scope of geografy as a school study; the basis of a course of study, its orderly development and methods of presentation

in the grades and the high school. Detaild work on a limited portion of the course of study by each member of class; preparation of reference lists for collateral reading; observation in training department. For superintendents, principals, and special teachers of geografy. (12 weeks.)

Texts: McMurry's Special Method in Geografy: Dodge's Course of Study in the Horace Mann School: State Course of Study: Course of Study in Training School: Four Pamflets on Important

Topics in Geografy.

COURSE THIRTEEN

ADVANST PHYSIOGRAFY

Life history of land forms; study and construction of maps and models; field lessons, meteorology; study and construction of wether maps; oceanografy. Chief topics of Course 1 treated from the standpoint of teacher, with much more library reference reading, field and laboratory work. For high-school teachers.

Text: Salisbury's *Physiografy*. Advanst Course. (12 weeks.)

COURSE FOURTEEN

GENERAL GEOLOGY

A study of geologic processes usually treated in physical geografy, followd by historical geology which deals with the more important events of geological history.

Text: Chamberlain and Salisbury's Introductory Geology.

COURSE FIFTEEN

CLIMATOLOGY .

A study of the atmosfere, its general circulation, cyclonic storms, etc.; climate as a geografical factor; its influence on man and the industries.

Text: Milham's Meteorology.

COURSE SIXTEEN

CONSERVATION OF NATURAL RESOURCES

A study of the natural resources of the United States and the world; their use and their conservation; the conservation movement in the United States, with especial reference to soil, forests, minerals, water.

Text: Van Hise's The Conservation of Natural Resources in the United States.

HISTORY

COURSE ONE

HISTORY REVIEW

This course is intended for special students who hav neither studied history in the high school nor had any experience in teaching it. The main lines of development from the colonial period to the present day ar traced and an effort is made to gain an insight into the method and spirit of the study of history. Fall and winter terms.

Text: McMaster.

COURSE TWO

THE FOUNDING OF THE AMERICAN NATION

This course is for graduates of the eighth grade entering the country-school program of the Normal School and for those intending to prepare for entrance into the Teachers College. The period studied extends from the discovery of America to the fall of the Federalist party in 1800. Attention is given to the study of Illinois history from the national point of view in accordance with the recommendations of the Illinois State Course of Study. Upper grade text-books in general use in Illinois ar examind and methods of using them are discust. The work is supplemented thruout with library work.

Text: Forman's Advanced History.

COURSE THREE

THE GROWTH OF THE AMERICAN STATE

This course continues the work of Course 2, bringing the narrativ down to the present. Relativly more time is spent on the history of our own state than in Course 2.

Text: Forman's Advanced History.

COURSE FOUR

This course is intended for students who have studied U.S. History in the high school or who hav taught the subject. The course consists of a summary of European conditions during the 15th and 16th centuries of our colonial and revolutionary eras, followd by a study of social, industrial, and political development during our national period to the Civil War.

Text: Channing's Student's History of the United States.

COURSE FIVE

RECENT AMERICAN HISTORY

An intensiv study of our development since the Civil War. The work of Reconstruction, followd by an analysis of our social, industrial, and political development since 1876.

A large number of different courses in history and civics ar taught because of the varying needs of students. Care should be taken to see that students enter the right class.

COURSE SIX

HISTORY METHOD IN LOWER GRADES

This course is to give the student an understanding of the meaning of history and its purposes in the grades. The State Course of Study and the course in the training school furnish the materials for the course. After a theoretical consideration of method in history, class exercizes in history in the training school furnish the basis for discussions and unifications of the work of the course.

COURSE SEVEN

HISTORY METHOD FOR HIGH SCHOOLS

This course is a study of the materials of history and the forms in which they ar recorded; the six chief lines of human activity, the social, industrial, political, religious, educational, and ethical; the scope of history in the high school, its aims, methods of study and recitation. Emfasis will be laid upon the selection and organization of materials of value to the history teacher in secondary schools.

COURSE EIGHT

ANCIENT HISTORY

This course is intended for juniors of the five and four-year programs. It carries the student from the earliest historical period to the invasions of the Roman Empire. It shows the contribution made by each of the early peoples toward the civilization of the race. Particular attention is given to the ancient republics and to the introduction of Christianity. Fall and summer terms.

Text: The Ancient World, West.

COURSE NINE

MEDIEVAL HISTORY

This course is intended for the students who hav had Ancient History. The origin and development of institutions and the progress of the people receiv the greater emfasis. It is the study of European development from the migrations to the Renaissance. Winter and summer terms.

Text: History of Western Europe, Robinson.

COURSE TEN

MODERN EUROPEAN HISTORY

This is a study of the expansion of Europe in the 16th century, the religious and political revolutions, and the unification of Italy and Germany. Emfasis is laid upon a view of present day conditions, problems, and tendencies in Europe, as well as upon the relations of Europe with America. Spring and summer terms.

Text: History of Western Europe, Robinson.

COURSE ELEVEN

ENGLISH HISTORY

This course develops the narrativ of English History from the beginning of the Tudor period to the present. The text is supplemented by extensiv library work on the more important lines of development. The influence of English History upon that of America; England as a sea power and her part as an agent of civilization; the industrial revolution; and the rise of democracy receiv especial attention.

Text: Short History of England, Cheney.

SENIOR COLLEGE COURSES

COURSE THIRTEEN

AMERICAN HISTORY

This course is an intensiv study of the colonial and revolutionary periods of American history. It is intended for prospectiv high-school teachers of history, politics, and social science. Emfasis is laid upon the economic, social, and political conditions of colonial life; upon the growth of self government and the lines of development that made separation from England necessary.

COURSE FOURTEEN

This is similar in method to Course Nineteen and covers the period from 1783 to the Civil War. Federalist supremacy; the Jeffersonian system; rise of national spirit; growth and influence of the West, development of transportation facilities; parties and party government, slavery, abolition, and Civil War.

COURSE FIFTEEN

This is a study of Reconstruction with the resulting southern problems; growth of municipalities; commercial expansion; rise of corporations, and other recent problems. Emfasis is laid upon recent changes and lines of development.

Courses 13, 14, and 15 will be given in 1915-16 and in alternate years thereafter.

COURSE SIXTEEN

EUROPEAN HISTORY

This course, as well as Courses 17 and 18, ar intended for special students in history and prospectiv social science teachers. They are similar in method to Courses 13, 14, and 15. The end of the political and social conditions of the so-cald Middle Ages is briefly considerd, followd by a study of the Renaissance with its multiplicity of interests; the Protestant Reformation, its causes, spred into different countries and resulting religious wars; the Peace of Westphalia, with a review of economic, social and political conditions at the time.

COURSE SEVENTEEN

EUROPEAN HISTORY 1648-1815

The chief subjects considerd ar: The era of absolutism, with its dynastic wars—Colonization—Industrial Revolution, French Revolution and Napoleonic periods—Congress of Vienna, 1815.

COURSE EIGHTEEN

EUROPEAN HISTORY 1815-1900

Review of economic and social conditions—Metternich's system—revolt, and growth of liberal ideals, France under Napoleon III.; unification of Italy and Germany; Russia and the Balkans; growth of democracy; situation at the opening of the twentieth century.

Texts used in Courses 16 to 18 ar Robinson and Beard's *The Development of Modern Europe* (2 vols.), and the accompanying *Readings* (2 vols.)

Given in 1916-17, and in alternate years thereafter.

CIVICS

COURSE ONE

ELEMENTARY CIVICS

This course is for beginners who hav neither studied civics in the high school nor had any experience in teaching it, and desire to prepare for a county elementary certificate. An effort is made to gain an insight into the spirit, form, and functions of our government.

Text: Forman's The American Republic.

COURSE TWO

ADVANST CIVICS

An advanst course in civics intended for students who hav had the elementary work or hav had experience as teachers of this subject. The origin and growth of laws and institutions ar studied. The relation of our constitution to colonial charters, to the political experiences of the provincial era, as well as to the English constitution, is traced with care.

The rights and duties of the citizen, his relation to the nation, to the states, and the units of local government ar considerd as essential topics. In placing these mutual relations the machinery of the government is studied, as ar the effects of its workings as seen in history. Party machinery for nominating and for carrying out its policies is studied. Fall and summer terms.

Texts: Civil Government in the United States, Fiske; Advanced Civics, Forman.

COURSE THREE

POLITICAL SCIENCE

This course deals with the nature, scope, and methods of political science; the nature, functions, and sfere of the state; nationality, citizenship, its rights and duties; constitutions, their sources and kinds; the distribution of government powers.

Text: Introduction to Political Science, Garner. Fall term.

COURSE FOUR

MUNICIPAL GOVERNMENT

A study of the rapid growth of cities in the United States and how they ar governd. The field of city government as distinguisht from state and national government. Problems of city government, as sanitation, transportation, lighting, garbage, parks, police, etc., will be considered in detail. The city boss and his systems; elections and nominating machinery. The Mayor-Aldermanic system and the rise and extension of the Commission form of city government. Spring term.

Text: Goodnow's City Government in the United States.

COURSE FIVE

POLITICAL PARTIES AND PARTY MACHINERY

A study of the history of political parties in the United States and the development of party machinery. The course begins with the organization of the Federalist and Republican parties under the leadership of Hamilton and Jefferson in Washington's administration and traces those parties to their dissolution in The rise and fall of the Congressional nominating 1820-24. caucus, together with the development of the legislativ caucus covering the same period, will be studied in connection with the history of the Federalist and Republican parties. The rise of the Whig and Democratic parties as successors to the Federalist and Republican parties will next be considerd, together with the origin and history of the National Nominating Convention. The organization of the Republican party of today and the history of that party, together with that of the Democratic party, to the present The rise of the Primary system toward a National Primary for nominating President and Vice-President. The initiativ. referendum, and recall platforms, the party boss and his system, along with prominent party leaders as Jefferson, Hamilton, DeWitt Clinton, Martin Van Buren, Thurlow Weed, Robert Toombs, Jefferson Davis, Thaddeus Stevens and Marcus Hanna. Winter term.

Texts: Parties and Party Machinery, Macy; History of the Presidency. Stanwood.

ECONOMICS AND SOCIOLOGY

COURSE ONE

ELEMENTARY ECONOMICS

This course, for Section M, aims to assemble the industrial facts alredy known to the students, to supplement these thru direct observation, to organize and systematize all with the help of a minimum of theory, and to introduce the student to economic questions of the day.

Texts: Ely and Wicker's Elemetary Economics. Winter term.

COURSE TWO

ECONOMICS

In the belief that the social environment is largely economic and that to understand it so as to get the most out of life or so as to help solv the complex problems that menace democracy, some knowledge of economics is necessary, this course has been programd for all seniors, whether they ar looking towards teaching in the grades or in the high school.

It affords, for an introductory course, a fairly comprehensive survey of economic theory and of economic problems. Seager's Principles of Economics is the text and is coverd in the twelveweeks by the students working up for themselves portions of the text along with appropriate supplementary readings, while the recitation periods ar devoted to the more difficult chapters. In the development of the theory constant use is made of concrete problems. The course is taught every regular term and the first summer term.

COURSE THREE

ADVANST ECONOMICS 3

One or more great economics and the related problems of the day ar studied. As it is usually best to take topics of greatest public interest at the time when the course is given, it is not advizable to announce these in advance. The work for the winter of 1914-15 was a study of contemporary economic politics, involving the tariff, revenue, trust, and money and banking legislation of the 63rd Congress. This course will be taught in the winter of 1916-17, alternating with Advanst Economics 4, which will be given in 1915-16. Prerequisit. Economics 2.

COURSE FOUR

ADVANST ECONOMICS 4

This course will be taught in the winter of 1915-16 and is a course similar to and alternating with Advanst Economics 3, but devoted to different topics and problems. Prerequisit, Economics 2.

COURSE FIVE

SOCIOLOGY

This course includes a discussion of the scope of sociology and of its relation to the special social sciences; of the nature of society, of its constituent elements and of the relation between the individual and society, of social evolution from consanguin organization thru the era of the state to internationalism. more practical fases of the subject receiv attention. pertaining to population form the basis for a discussion of problems of immigration, of rural and city life. Social questions connected with the family organization, or arising from our system of labor, or from the unequal distribution of welth, and in particular those of special interest to teachers—such as the state's treatment of dependents, defective, and delinquents—receiv atten-

Taught every spring and first summer term and in the fall of 1915 and alternate years thereafter.

Only students who hav completed Economics 2 or an equivalent course may be admitted to the fall term classes.

Two texts ar used: Small and Vincent's Introduction to the Study of Society and Wright's Practical Sociology.

COURSE SIX

SOCIAL PROBLEMS

This course will be taught in the fall 1916 and alternate years thereafter. It includes the briefest possible preliminary survey of sociological theory and a careful study of several great problems that ar sociological rather than economic—such as immigration, crime, poverty and pauperism. Ellwood's Sociology and Social Problems affords an outline for the term's work, but much library reading is required. Prerequisit, Economics 2.

COURSE SEVEN

AMERICAN INDUSTRIAL HISTORY

A text-book (Bogart's), constructed on the chronological plan, is used, but the lines of development ar kept distinct and continuous thruout the course. Course Seven alternates with Course Eight and will be taught in the spring term, 1916. Prerequisit, Economics 2.

COURSE EIGHT

ENGLISH INDUSTRIAL HISTORY

This course is similar to and taught alternately with Course Seven. Taught in the spring term of 1917, etc. Prerequisit, Economics 2,

Cheney's Industrial and Social History of England; Texts: Hayes' British Social Politics.

LITERATURE

COURSE ONE

POETRY AND THE NOVEL

Classroom study of the minor epic in Mathew Arnold's Sohrab and Rustum, and the novel in George Eliot's Silas Marner. Outside of the class a further study is made of narrativ verse, usually Tennyson's Princess or The Idylls of the King, and of the novel in one of Scott's or Hawthorne's novels. This is followed by careful class discussion, in which both the substance and the artistic structure and value of these masterpieces ar considerd. In 1915-16 The Princess and Quentin Durward. Winter and summer terms.

Texts: Sohrab and Rustum, Riverside Literature Series. Silas Marner, Appleton's. The Princess, Rolfe's. Quentin Durward, Appleton's. Idulls of the Kina. Rolfe's.

COURSE TWO

POETRY ESSAYS, SPEECHES, AND THE NOVEL

Lyric and narrativ verse in the volume of selections from Wordsworth, made by Mathew Arnold, and two books of the great epic Paradise Lost form the basis of the classroom work. The outside work consists of reading from Emerson's Essays, First Series, and selected essays from Lamb's Essays of Elia, or Arnold's Culture and Anarchy, or Carlyle's Sartor Resartus, speeches by Burke or Webster, and a novel by one of the greater novelists. This outside reading is followd by careful class discussion. In 1915-16, Emerson's Essays, First Series, and selected essays from Addison, Lamb, Thackeray, and Bacon, and Thackeray's Henry Esmond.

COURSE THREE

SHAKSPERE

Two plays ar studied in detail in class; in 1915-16, Macbeth and Hamlet. Outside of the class three more plays by Shakspere or Marlowe, ar red and then carefully discust in class. In 1915-16, Midsummer Night's Dream, Julias Caesar and Richard III.

Some attention is given to the Elizabethan theaters, the circumstances under which they came into existence, and the conditions under which plays were presented in them. The chief purpose of the course, however, is to give an understanding of the drama, its essential nature, its structure, its limitations, and its powers, and, more definitly still, to make students intelligent readers of Shakspere themselvs, and intelligent guides to others. Winter, spring, and summer terms.

Texts: Shakspere, Arden, Rolfe's, Hudson's, or Porter's First Folio Edition.

COURSE FOUR

LITERATURE METHOD

This is a comprehensiv course in method and the conditions that determin method. It includes a study of the essential nature of literature; its right to a place in the curriculum; its proper function there; the various facts and conditions to be considerd in determining a course of study in literature from the first primary to the last high-school year; and of the problems that arise in the actual teaching in the elementary and the high school. This work is based on the text *Literature and Life in School*, and requires a good deal of library work. In the fall term the course gives more careful attention to the primary grades, in the winter to the high school, in the spring to the upper grades. All terms.

TEACHERS COLLEGE COURSES

COURSE FIVE

LITERARY TYPES

This should be the first course in literature taken by students of the Teachers College. It includes a study of lyric and narrativ verse, of the essay, the novel, and the drama. Its purpose is to make clear what kind of knowledge of these literary types and what sympathetic and intelligent mastery of individual works in the several type forms ar necessary for one who would teach them intelligently. It servs as an introduction to the more comprehensiv course in method and to the more advanst special courses in these several fields of literature. Fall and summer terms.

Text: Johnson's Forms of English Poetry.

COURSE SIX

ENGLISH POETRY OF THE NINETEENTH CENTURY

Page's British Poets of the Nineteenth Century is used as a text. Study is made of the characteristic themes dwelt upon by the poets red, of their characteristic modes of thinking and feeling, of their favorit verse forms and their mastery of these forms, and of their relations to their times and their significance in the social and intellectual and artistic life of the nineteenth century. Fall and summer terms.

COURSE SEVEN

HISTORY OF LITERATURE

This course is intended to meet the requirements of the examination for state certificate. At present, therefore, it covers

the history of American literature and of the Elizabethan and nineteenth century periods of English literature. The texts ar Halleck's New History of English Literature and Halleck's History of American Literature. Constant use is made of Saintsbury's Elizabethan Literature and Nineteenth Century Literature, the Cambridge History of English Literature, of Moody and Lovett's English Literature, and other standard works. Winter and summer terms.

COURSE EIGHT

COLLEGE COURSE IN SHAKSPERE

For this course the student should hav a complete edition of Shakspere and of MacCracken, Pierce and Durham's Introduction to Shakspere. From fifteen to twenty plays ar studied, including comedies, histories, and tragedies from Shakspere's earliest work to his latest. Questions of sources, time of composition, plotting, characterization, motivation, language, technique, and dramatic power ar discust with reference to the plays. The Elizabethan stage and its influence on the structure and mode of presentation of plays ar considerd. Pedagogical questions ar discust incidentally. Spring term.

COURSE NINE

AMERICAN POETRY

This is a course in rapid reading of the American poets from Bryant to Moody and Peabody. While most attention is given to the work of Bryant, Poe, Emerson, Longfellow, Whittier, Holmes, Lowell, Whitman, and Lanier, who ar included in the text used, the course is ment also to give some knowledge of such later or minor poets as Aldrich, Sill, Guiney, Peabody, Moody, Tucker, Carman, Hovey, and Gilder. The text is Page's *Chief American Poets*. Fall term 1915 and alternate years thereafter.

COURSE TEN

ENGLISH DRAMA

This is the study of the development of the drama from the miracle plays down to the closing of the theaters by Parliament. It requires a rapid reading of many Elizabethan plays chosen from Lyly, Kyd, Greene, Marlowe, Shakspere, Dekker, Jonson, Beaumont and Fletcher, Heywood, Middleton, Ford, Webster, and Massinger. It includes a study of the relation of the drama and the theater to the Elizabethan and Jacobean worlds. It should give the student the power to see Shakspere in a truer perspectiv.

The text used is Neilson's *Chief Elizabethan Dramatists*, but a great deal of library work is required on periods not coverd by this. Winter term 1915-16 and alternate years thereafter.

COURSE ELEVEN

THE ENGLISH NOVEL

With but slight consideration of the literary forms that finally made the novel possible, this course procedes from Richards on thru Fielding, Smollet, Sterne, Goldsmith, Fanny Burney, Miss Edgeworth, Scott, Jane Austen, Dickens, Thackeray, Charlotte Bronte, George Eliot, Trollope, George Meredith, Hawthorne, Mrs. Stowe, Thomas Hardy, Henry James, and Howells. It give some consideration to such typical contemporary English and American writers as Bennett, Galsworthy, Nicholson, Harrison, and Wharton. Cross's Development of the English Novel is used as a guide in some mesure, but the library is the main dependence for material. Spring term and summer term, 1916.

COURSE TWELV

ENGLISH POETRY

With Manly's *English Poetry* as text, this course is ment to give some personal knowledge of the tresures of English poetry, lyric and narrativ, from Chaucer to Wordsworth. It is a study of both substance and form of the themes that most ardently interested the English people from time to time in their social and political development, and of the artistic forms borrowd from others or created by themselvs as means of expression. Fall term 1916 and first summer term 1916.

COURSE THIRTEEN

BROWNING

For this course the student should hav either Macmillian's or Houghton Mifflin's one-volume edition of Browning's works. It includes a study of the dramatic monolog as developt by Browning and of many of his best poems in this form, of his chief lyrics and narrativs, of Pippa Passes, Balanstion's Adventure, In a Balcony and The Ring and the Book. Winter term 1916-17, summer term 1916.

COURSE FOURTEEN

NINETEENTH CENTURY PROSE

This covers the most important representativ English and American prose writers of the nineteenth century. It gives some acquaintance with the thought and style especially of Lamb, De-Quincey, Carlyle, Ruskin, Arnold, Emerson, Holmes, Lowell, Thoreau, and their significance. Some reading is assignd also in Pater, Morley, Macaulay, Huxley, Lincoln, and Repplier. Spring and first summer terms 1917.

GRAMMAR AND LANGUAGE

Aim: 1. To give the student the essential facts of the subject.

2. To prepare him to express these facts in as simple a way

as is consistent with accuracy.

- 3. To show him that topics may be presented in such an order that but one difficulty will be met at a time, and that this, when masterd, will prepare the way for others; to show also that such an order makes it possible to acquire nice discrimination from the first, and that power to make fine distinctions is one of the chief values of the subject.
- 4. To enable him to apply in a practical way the theory that because of the analytical nature of our language the thought element must predominate over the form element in the study of its grammar.

Topics: Part I. The Sentence. The simple sentence with its essential elements is first considerd; then element after element is added until all ordinary English construction has been studied. The parts of speech ar defined as the development of the sentence makes their introduction necessary, but only such classification is made as is based on use.

Part II. Parts of Speech. Classification, summary of uses, inflection. Text-Book: Gowdy.

The subject as outlined above is given at three different rates of speed:

Course One (12 weeks) for high-school graduates. Courses Two and Three (18 weeks) for Section L.

Courses Four and Five (24 weeks) for Sections M. N. and O.

HISTORY OF THE ENGLISH LANGUAGE

A brief course showing the development of English idioms, and the chief phenomena of grammatical and orthografic change.

Text: Emerson.

COMPOSITION AND RHETORIC

People compose whenever they speak or write their own thought. If the composition is poor, it is usually because the thinking is ill-orderd. Every teacher who insists upon logical thinking and clear statement is a teacher of composition. While it is true that the forms of composition may be discust and standards determind in a class dealing with the forms of discourse, it is found, as in spelling or pronunciation, that correct habits ar establisht only when all teachers unite to see that correct forms ar used at all times. The best form is that which best fits the content.

The best practis in composition is not in miscellaneous "exercizes" with no purpose or value outside of practis. It is obtaind rather in writing and speaking matter that would need to be written and

spoken even if there were no class in composition.

The work in Nature Study and Elementary Physics consists largely of observation. To give definitness to the observations. and to make just comparisons possible, these observations must be recorded. Similarly the results of observations and comparisons need to be stated in organized form.

For the reasons stated above, instruction and practis in elementary composition needed by first-year students is given in connection with the elementary science. Besides this instruction there ar offerd to students the following courses:

COURSE ONE

COMPOSITION

An elementary course based on Huntington's Composition. and Woolley's Handbook of Composition: required of students in the preparatory program and recommended to others who lack early training in composition. Fall term.

COURSE TWO

RHETORIC

This is a practical course in the science of rhetoric and art of composition. Two papers a week ar written and criticized. Emfasis is laid on the mechanics of Composition—punctuation, spelling, and paragrafting. The study of letters and letter-writing is an important part of the course. Scott and Denney's Composition—Rhetoric is the text.

COURSE THREE

SCIENCE OF DISCOURSE

This is an advanst course based on Barrett Wendell's English Composition and Herbert Spencer's Philosophy of Style.

Two weekly themes ar required. The criticism and discussion of these occupy two periods of each week. The best themes ar reservd for publication in the "Vidette."

For admission to Course 3 students should hav the preparation stated on page 17. Lacking this they take Courses 1 and 3 in rhetoric and at least two courses in literature.

COURSE FOUR

SPECIAL ENGLISH

An elementary course in composition offerd for those who ar deficient. Huntington's Elements of English Composition is used as a text. No credit.

ORTHOGRAFY

The purpose of this course and of the course in spelling is to prepare students to teach the orthografy outlined for the seventh and eighth years in the Illinois State Course of Study. It consists mainly of word-analysis and drill in marking diacritically and pronouncing five hundred or more words in common use which ar frequently mispronounst; such as, address, alternate, apparatus, bouquet, comparable, def, extol, genuin, government, idea, and a great deal of drill in the use of the dictionary. In the analysis of words, the meaning of the most frequently recurring roots, prefixes, and suffixes ar lernd. The three rules of spelling given in the Illinois State Course of Study ar lernd and applied, and at least one week is given to simplified spelling.

This course is not included in the two-year program. In the three-year program it is a six weeks' course; in the four-year program it is a twely weeks' course. All terms.

SPELLING (5 WEEKS, OR LONGER IF NECESSARY)

All students, including those admitted to Section F, ar offerd an examination in spelling on the sixth and eleventh Fridays of each term. Those who show by such examination the ability to spell ninety out of one hundred familiar words, such as lose, led, busy, until, separate, reference, occurd, notable, ridiculous, accommodate, recommend, ar excused from further work in spelling. Those who do not pass the examination ar required to take a course of six weeks, or longer if necessary, and take it the following term. Due attention is given to the simplified forms recommended by the Simplified Spelling Board and authorized by the New Standard and the New International dictionaries.

PENMANSHIP

WRITING DRILL. (6 WEEKS, OR LONGER IF NECESSARY)

The object of this course is to enable students to improve their writing if it is manifestly'illegible or in bad form. It includes blackboard drill in movement exercizes, as outlined in the Illinois State Course of Study, with musical accompaniment to secure smoothness and harmony of movements. It is a required subject for those whose writing is distinctly poor.

READING AND PUBLIC SPEAKING

COURSE ONE

ELEMENTARY READING

This is an elementary course designd for those students who hav had little experience in oral reading. Special emfasis is laid upon assimilating the thought and then presenting it clearly.

Natural Drills in Expression, supplemented by Julius Caesar

or Merchant of Venice.

COURSE TWO

The first consideration in this course is an understanding of the spirit of literature, and that literary appreciation must precede vocal expression. Then the various essentials of interpretativ readings ar studied; the group as the unit in the process of thought-getting, emotional values, succession of ideas, atmosfere, climax, tone-color, central idea, contrasts, rhythm. A grasp of the spirit of literature and the technique of the printed page leads to daily drills in vocal expression. Finally, thruout the course reading aloud is made the mesure and test of the student's grasp of the absolute life of literature.

Texts: Drill Book in Dictionary Work; Metcalf and DeGarmo. Classics for Vocal Expression; Curry. Romeo and Juliet, Macbeth,

The Tempest.

COURSE THREE

THE READING OF POETRY

The primary purpose of this course is to show what poetry is and to train the student in rendering it orally. It deals with various examples of poetic art. 1. Intellectual, imaginativ, and emotional aspects of literature. 2. The elements of lyric, epic, and dramatic poetry. 3. Rhythm, rime, alliteration, assonance, tone-color. 4. Analysis as a preparation for oral expression.

Texts: English Poetry, Its Principles and Progress, Gayley

and Young. Othello, King Lear, Hamlet, or Antigone.

COURSE FOUR

The same as Course Three with the addition of a study of phonics.

COURSE FIVE

HOW TO TEACH READING

A .- Primary Reading, Grades I.-IV.

This is a course that discusses the various problems that arise in teaching reading in the public school. Observation lessons by the critic teachers run parallel with classroom work. Teachers expecting to teach in the primary grades should take Division A of this course and follow it with Story-Telling.

Text: Pedagogy and Psychology of Reading, Huey.

B.—Grades V.-VIII.

This particular division will study the problems that arise in the intermediate and upper grades.

Text: How to Teach Reading in the Public Schools Clark.

COURSE SIX

THE ART OF STORY-TELLING

This is a course designd to meet the needs of the teacher in the elementary grades and the high school. It quickens the imagination, develops the insight into literature, incites growth in the spirit of literature insted of slavish dependence on the letter of the selection. It causes the story teller to see clearly and think deeply and present the great points of the story. The stories studied will be the world stories that hav influenst the race. They will be taken up in sequence and their relation to the spiritual development of the race will be shown. Summer term.

Text: Story-Telling, St. John.

COURSE SEVEN

PLATFORM READING

An advanst course pland especially for those who wish to enter contests and for all who feel the need of skill and finish for appearing in public.

The selections studied will be of the highest type of literature and great attention will be paid to the interpretation and delivery. Open to students who hav completed Course III. or Course IV. Electiv. Winter term.

Text: Lessons in Vocal Expression, Chamberlain and Clark.

COURSE EIGHT

EXTEMPORANEOUS SPEAKING

The preparation and delivery of original speeches. The student is shown that effectiv speaking grows out of obedience to accurate laws and that it is never a matter of impulse. The impelling motivs, the factors of interesingness, the central idea, the ends of speech ar the chief details of this course. Naturalness and earnestness ar sought at all times. Subjects ar chosen from current topics, literature, economics, science, sociology. Special attention is given to the short 3, 5 and 10-minute speech for a definit occasion, such as institute, convention, lodge, after-dinner, club, or church.

Text: Effectiv Speaking, Phillips.

COURSE NINE

ARGUMENT

The theory of argumentation, with practis in preparation of briefs. This work leads up to oral debates. Here special stress is laid on team work and oral delivery. Fall term.

Text: Argumentation and Debating, Foster.

COURSE TEN

THE SPEAKING VOICE

This course aims to lay the basis of a correct use of the speaking voice. Individual and class drills and exercises ar used to secure flexibility, projection, volume, support, resonance, and control of the tone. Especially designd to benefit the classroom voice. Fall term.

Text: The Speaking Voice, Everts.

COURSE ELEVEN

THE ANALYSIS AND PRESENTATION OF THE DRAMA

This course will present the drama as a living agent and by analysis and presentation make vivid examples of ancient and modern drama. The dramatic work of the school will grow out of this course and students entering it must hav taken other courses designated by the instructors. After an understanding of the tchnique of the drama and its analysis the class will present scenes and a selected drama.

The following plays will be analyzed and presented in part or whole in the class:

The Land of Heart's Desire, Julius Caesar, Antigone, Romancers, The Critic, She Stoops to Conquer, Edipus Rex, Esmeralda, Richelieu, The Lady of Lyons, Alcestis, Medea, Ulysses, In a Balcony. Winter term.

COURSE TWELV

ADVANST PUBLIC SPEAKING

A course for those who hav taken extemporaneous speaking. The various kinds of speeches ar considerd, such as lecture, after-dinner speech, institute talk, commencement address, political speech, dedicatory address. The basis of the work is the larger speech on the more formal occasion than the extemporaneous speech demands.

Text: The Forms of Public Address, Baker. Spring term.

LATIN

Two forms of the undergraduate curriculum in Latin ar offerd: The first of four credits for students who hav alredy completed in three years' work in Latin, the other of ten credits for beginners.

Seven advanst courses (Courses 11, 12, 13, 14, 15, 16 and 17) ar offerd, all of which may be counted towards a degree.

Graduates of approved high schools, if they hav three or four years' Latin, may substitute the four courses in method outlined below and any two advanst courses for credits in their regular course, as may be directed.

Students in the longer programs may substitute Latin for stard subjects as shown in the programs on pp. 24, 25, 26.

Beginners ar advized not to take up the study of Latin unless they propose to complete at least two years' work.

For the first year's work in the courses for beginners one credit is allowd, for the second year's work two credits.

THE FULL LATIN CURRICULUM

The entire curriculum as provided for beginners consists of ten terms, numberd consecutivly as follows:

Courses one and two, Latin Grammar and Reader.

Courses three, four, and five, Selections from Roman History, Nepos, and Viri Romae and composition based thereon. Two books of Caesar.

Text: Rolfe's Junior Latin Book.

Courses six and seven, Cicero's Orations, Harper and Gallup. Course eight. Ovid. Kelsev.

Courses nine and ten, Vergil's Aeneid, Frieze.

In aim, content and method these courses ar similar to the Latin Method Courses described on the next page.

LATIN METHOD COURSES

COURSE ONE

METHOD OF BEGINNING (FIRST YEAR) LATIN

Prerequisit: An academic knowledge of the usual first year's work. A re-examination of Latin grammar, the search being in the main one for unity and harmony. Comparativ view of the declensions and conjugations and correlation of fonetic changes with fenomena that the pupil is acquainted with. Physiological explanation of fonetic changes. Introductory study of syntax, or of how Latin expresses the main types of relations. The question is askt at every step: What is the English (or the German) way of expressing the same relation? Roman Pronunciation, with special care for the long vowels. Bennet's Teaching of Latin. Appendix of Bennett's Grammar. Fall term.

COURSE TWO

CAESAR AND CICERO METHOD

The first six weeks of this course ar an inductiv study of the Latin ways of expressing those relations that offer to beginners the most difficulty, the collection of all examples in Caesar of these constructions, and the examination of different authorities. Thus ar studied *cum*-clauses, the gerund and gerundiv, the uses of the dativ. etc.

The second six weeks' study is based upon Cicero's orations. It is insisted that the translation be worthy of the Latin original and that it be given in the class as it should be in the reading class. The Cicero class that is not a good rhetoric class and a good reading class is not a good Cicero class. Winter term.

COURSE THREE

LATIN-ENGLISH ETYMOLOGY

The work will be of an advanst character, but only two years of Latin ar required as a prerequisit. It may be taken for its cultural value by those who ar not specializing in Latin.

This course is expected to give the student a much more lasting and comprehensiv view of both the cognate and the lineal relationship of Latin and English than can be given incidentally in connection with the other Latin courses. It should be taken by all who expect to teach much Latin. Spring term.

COURSE FOUR

METHOD IN VERGIL AND OVID

Careful translation of the text and study of scansion. Much attention is given to mythology and to the literary and the archeological fase of the work. Fall term.

Students who take the Latin Method Courses above should take also two of the following courses:

COURSE ELEVEN

Advanst Reading. Livy.—Prerequisits: Courses 1-4 above, or four years of high-school Latin.

Comparativ syntax of Livy and Caesar. Discussion of secondary school problems that pertain to Latin. Taught in the winter of the school year of 1915-16. Text: Lord.

COURSE TWELV

Advanst Reading. Horace.—Prerequisit: Course 11 or 13. Taught in the spring of 1916. Text: Smith.

COURSE THIRTEEN

Advanst Reading. Tacitus, Germania and Agricola.—This course alternates, as to the years it is taught, with Course 11. Prerequisit: Courses 1-4 or four years of high-school Latin.

Taught in the winter term of the school year 1914-15.

COURSE FOURTEEN

Advanst Reading.. Plautus, Captivi. Terence, Andria.—This course alternates as to the year it is given with Course 12. Spring of 1915. Prerequisit: either Course 11 or Course 13.

COURSE FIFTEEN

Advanst Course in Writing Latin.—A preliminary review of elementary work, followd by the writing of connected discourse more difficult in character. Fall term every year.

GERMAN

FIRST YEAR'S WORK

Courses 1, 2 and 3, taught successivly each fall, winter, and spring term, constitute the first year's work in German. They include grammatical drill, composition, some practis in conversation, an elementary view of English-German philology, and the translation into English of 375 pages of German, including one classical drama. These three courses, or two years' of high-school work, ar a prerequisit to any of the advanst courses 4-9.

COURSE ONE

Elementary course; pronunciation, grammar, and easy reading. Mezger and Mueller's *Kreuz und Iner durch Deutsche Lande*. Fall term.

COURSE TWO

Grammar, syntax, and reading of modern prose. Memorizing of prose and verse. Kreuz und Iner durch Deutsche Lande. Storm's Immensee, and his In St. Jurgen. German Poems for Memorizing. Winter term.

COURSE THREE

Translation into German, grammatical drill, dictation, translation into English of Schiller's Wilhelm Tell, memorizing of lyrics and ballads. Clayton's Material for Oral Translation. Spring term.

Prerequisits: Courses 1, 2 and 3, or two years of high-school work.

TEACHERS COLLEGE COURSES

Prerequisits: Courses 1, 2, and 3, of high-school work.

Students wishing a recommendation as to their ability to teach German should take at least three of the courses 4-9, arranging to substitute the same for subjects regularly in their programs.

Students seeking a degree and selecting German as a prin-

cipal subject, should take all the courses 4-9.

Courses 2-9 include a thoro study of German grammar, Joynes-Meissner, Parts I., II., and III. They include constant practis in conversation and composition in connection with grammatical studies and the memorizing of German idioms, thru freie Reproduction and thru epitomes of, and composition exercizes based upon, the texts red. As the course progresses German becomes increasingly the language of the classroom. Much more attention than is usually the case is given to English-German philology. During each year of advanst work, there will be a thoro discussion of the aims, methods, and courses of high-school German.

COURSE FOUR

Freytag's Die Journalisten Lessing's Minna von Barnhelm, Lyrics and Balads, Hatfield. Fall term.

COURSE FIVE

A study of the life and works of Schiller. Die Jungfrau von Orleans and Marie Stuart. Winter term.

COURSE SIX

A study of the life and works of Goethe. His *Egmont*, his *Hermann und Dorothea*, and many of his lyrics will be red. Spring term.

COURSE SEVEN

Freytag's Soll und Haben, and his Karl der Grosse. Study of the idioms of recent and contemporary German prose. Fall term.

COURSE EIGHT

Sudermann's Frau Sorge. Heine's Die Hartzreise and some of his lyrics will be red. Winter term.

COURSE NINE

A study of the life of Goethe. Selections from *Dichtung und Wahrheit*, and *Iphigenie auf Tauris* will be red; also many of Goethe's lyrics. Spring term.

In courses 7, 8 and 9, one hour a week will be spent in Ger-

man conversation. Bacon's Im Vaterlande.

PUBLIC SCHOOL MUSIC

COURSE ONE

This course is for beginners.

Songs lernd thru imitation. The elements of music—ear concepts—deduced from the familiar songs.

Notation—eye concepts—as it pictures the familiar musical elements. Sight-reading. Key and mesure signatures, and all forms of notation necessary to the intelligent reading of vocal music.

Text: Elements of Music in Song. Westhoff.

COURSE TWO

Sight-reading in unison, and two, three, and four-part harmony. Practis in chorus singing. A study of all ordinary mesure forms. Written work as a further means for ear and eye training.

Text: Elements of Music in Song. Westhoff. A variety of musical selections in octavo form.

COURSE THREE

ADVANST SIGHT READING

This course is for students who hav finisht Course 2 or its equivalent, and who intend to teach in intermediate or grammar grades.

The major, minor, and chromatic scales; intervals and chords; modulation and key relationship.

Texts: The Laurel Singing Book, and a collection of music in sheet form.

COURSE FOUR

PRIMARY MUSIC METHODS

The complete song as a basis for the child's music education. Selecting songs: (a) With reference to their use; (b) with reference to the child voice. How to teach a rote song. Development and care of the child voice. The monotone. Observation of the simpler elements of song. Notation of familiar melodies. Reading simple melodies. Written work. Fall and winter terms.

Practis teaching in the Model School.

Text: Eleanor Smith's Music Course, Primer and Book I.

COURSE FIVE

METHODS

This course covers the work for grades four to eight inclusiv. (Prerequisit: Course four.)

Classification of the elements of music and the presentation of their parts in logical succession. The problems involved in the art of reading vocal music, considered from the teacher's point of view. Tone production, and classification of voices in the upper grades. Song interpretation.

Practis teaching in the Model School.

COURSE SIX

High-School Music—Bibliografy of high-school music. Chorus conducting. Organization of an orchestra; glee clubs. A study of the lives and works of the great composers.

Practis teaching.

COURSE SEVEN

Elementary Harmony. Musical History. Music Appreciation. Form in Music.

THE CHORAL CLUB

The Choral Club—a chorus of mixt voices—meets twice each week. Composition of the better class and excerpts from the standard cantatas, operas, and oratorios ar studied and prepared for public presentation. Three concerts ar given each year.

THE GLEE CLUBS

Practis in part singing may be further developt in connection with the work of the Girls' and Boys' Glee Clubs, which meet twice a week for practis.

THE ORCHESTRA

Students who play upon orchestral instruments ar given an opportunity for practis in concerted playing. The orchestra holds one rehersal each week.

THE BAND

The Normal University owns fifteen instruments, upon which regular lessons ar given until sufficient skill is gaind for concerted playing. The band and orchestra furnish music for the social functions of the school.

ART DEPARTMENT

There is a growing demand for teachers who can introduce elementary instruction into the smaller cities of the state. In many respects this school affords excellent facilities for the training of special teachers. The kindred arts ar being rapidly developt with the best equipment. The professional studies of the normal school enable the students of art to lern the proper setting of art courses in the public-school curriculum.

All students in the special program of Art and Design will leave for the use of the institution at least one example of their work in sketching, painting, etc., and one of their work in the crafts.

COURSE ONE

FREEHAND DRAWING.

This course treats simply of the technique of drawing as a language. There is little effort to touch the art element.

The scope, function, divisions and kinds of drawing, fore-shortening and convergence, and light and shade ar the subjects.

More extensiv treatments of these subjects ar offerd in courses two and three.

It is recommended that courses seven and eight be elected to supplement this course.

COURSE TWO

PRIMARY TEACHERS' COURSE

There ar two parts; one that considers the subject for the children and the other for the teacher.

Suggestions in regard to illustrativ drawing, play modeling, elementary object and nature drawing make up the first part.

The second part includes effectiv blackboard drawing, study of the pose, picture study for the lower grades, and the elements of the three branches of form study: construction, appearance and design.

It is recommended that courses seven and eight be elected to supplement this course.

COURSE THREE

DRAWING FOR RURAL SCHOOLS

Study of objects in mass drawing that ar interesting in color and shape.

Simple suggestions in regard to convergence and foreshortening in the appearance of objects.

Flowers, sprays, fruits, vegetables, trees, animals in characteristic pose, and simple landscapes ar selected with a hope of

adding to the pupil's appreciation of the beauty in the things about him.

It is recommended that courses five and six be elected to supplement this course.

COURSE FOUR

MODELING AND FORM STUDY

Study of the shape of common objects with attractiv form. For one month clay is the medium, then a soft led pencil is used in making elementary working drawings and in rendering mass, outline, and tone sketches.

COURSE FIVE

FREEHAND PERSPECTIV

This course is introduced by a discussion of the scope, function, divisions, and kinds of drawing, which leads to the problem of convergence and foreshortening.

Chief problems: Curvd-edge objects:—Three views of the circle, concentric circles. Straight-edge objects: nine typical positions of an object as to the observer. Study of parallel receding edges and foreshortend faces. The problems ar studies made from local conditions and may be reset to the opportunities of any other school.

COURSE SIX

LIGHT AND SHADE

Training in light and shade is a fundamental element in the appreciation of the beauty in objects.

This course begins with the study of two faces of an object in flat values. Later there is a consideration of three faces, curvd faces, shadows, reflected lights, composition in two and three tones, translation of color. The last part of the course applies some of the principles discoverd in the foregoing to blackboard illustrativ sketching.

COURSE SEVEN

CAST DRAWING

This is advanst work in light and shade for students in the special art and design course, intended to develop the skill necessary for a supervizor of drawing.

Casts of hands, heds and the antique ar used in developing the principles of foreshortening.

COURSE EIGHT

COLOR

Color-knowledge and color-training ar essential to good taste in the use of color. The use of color has much to do with the nervous system.

The course considers the spectrum, tints, shades, tones and intensities, color characteristics and a theory of color harmony. Simple nature studies ar used. Plants, sprays, fruits, vegetables and nearby views.

COURSE NINE

COLOR PRACTIS

This is a continuation of course seven, for students in art and design. It includes advanst work in water color and blackboard practis with colord crayon. Flowers, fruits, and landscapes ar studied with special reference to high-school teaching and supervizing.

COURSE TEN

PAINTING AND REPRESENTATION

This course is a study of picture-making: how to paint, what to represent, and how to organize a picture. Essential points ar arrangement of lines, spaces, tones and values. Points in this course ar similar to those in rhetoric, in language and harmony in music. Study of the works of master artists in regard to points of composition is an important means to the end. Most of the problems ar workt out first in a simply dry medium (charcoal). Later oil paints ar used. While skill with any medium cannot be gaind in a short time, the important side of this course can be appreciated by any faithful student who may be admitted to the advanst courses.

COURSE ELEVEN

ART APPRECIATION

This course consists of a careful understanding of art, architecture, and sculpture by including a brief outline of the history of art as presented by painters from the Renaissance Period thru the modern schools.

The Illinois Picture-Study course is carefully discust.

The architecture of the Egyptian, Greek, Roman, Byzantine, Saracenic, and Gothic schools is carefully analyzed and reviewd.

The school is well supplied with a good reference library, pictures, lantern slides, casts, and other collections.

Texts: DeGarmo's Art Appreciation, and Van Dyke's History of Art.

COURSE TWELV

ART ORGANIZATION

The topics:

The relativ importance of different branches of public-school art and their relation to each other; the aims and standards of successful work; tentativ plans and courses of study; study of proposed standard courses; the opportunities of the art teacher aside from her technical work.

COURSE THIRTEEN

PRINCIPLES OF DESIGN

A study of composition developing the principles of arrangement in line, dark and light, and color thru exercizes and class projects, as well as discussion of good design in the larger fields of painting, architecture, costume, the house and various crafts. Design is made a living subject—the effort being to develop strong appreciation for beauty and some ability to execute.

COURSE FOURTEEN

PRIMARY HANDWORK

A course arranged on the basis of materials used in the elementary grades to give opportunity for expression in construction work.

The course includes practical work, compilation of illustrativ material and reference notes, book reviews and observations in the elementary grades. The course is arranged primarily for teachers of intermediate grades and supervizors. Major credit is given when the course is taken two consecutiv hours.

COURSE FIFTEEN

INDUSTRIAL ART FOR ELEMENTARY GRADES

This course consists of practical work, assignd readings in related subject matter, trips to factories and stores, and discussion of processes. Work for the first six grades will be coverd. Materials used ar sand, clay, paper, textil materials, and thin wood. The aim of this work in the school room is not only to meet the usual aims of handwork but also to bring the child into conscious relationship with his environment and show his contact with larger society.

The section is limited to thirty students who hav alredy had some course in handwork. The course is especially recommended for principals, special teachers and those grade teachers who ar interested in making handwork a more vital subject in the curriculum.

COURSE SIXTEEN

ART METAL

Copper and silver ar the metals used in this course. Problems suitable for intermediate grades and high-school classes ar made, using the following processes: etching, saw piercing, soldering, riveting, repousse, and simple work in enameling. In working with silver, simple jewelry making, including the setting of gems, is taught.

While a sequence of practical problems is arranged for the students in order that all processes may be lernd, these ar so arranged as to offer much opportunity for individuality. A knowledge of the principles of design is very desirable for those taking this work

COURSE SEVENTEEN

POTTERY

Clay, to the craftsman one of the most interesting materials, is the basic material for pottery problems made by modeling, flat and round coil bilding, and thru the use of the wheel and molds. The decoration of pottery is done by incise lines and areas, clay piercing, relief modeling, glazing and inlay.

In addition to the series of bilt pottery problems the students in this course lern mold making, how to mix and apply both gloss and matt glazes, the construction of kilns and obtain experience in firing a muffle kiln.

A course of design is of great value in connection with this course.

Major-two hours.

COURSE EIGHTEEN

BOOKBINDING

A course for craftsmen and teachers of intermediate grades. The course begins with practical problems for the intermediate grades, which ar followd by commercial and craftsmanlike methods of sewing on tapes, sunken cords and raisd cord bindings; as well as pamflet-binding, book-repairing, and rebinding of old volumes. These methods ar carried on both with and without the aid of bookbinding machinery.

One week in the course is devoted to the study of the history of records, from the times of picture-writing to the making of the modern book.

Major-two hours.

COURSE NINETEEN

HOME DECORATION

"The art training which belongs in the elementary school is that training which makes for a better appreciation of esthetic standards and which finds expression in making things more pleasing than they otherwise would be." James E. Russell, Dean, Teachers College.

It is this spirit which helps create such courses as Costume Design and Home Decoration. It is here that we especially study Art principles in terms of things about us. The course in Home Decoration includes a study of the construction of the home and its furnisht details from the standpoint of the designers. Reference work, practical color plates and the compiling of illustrative materials occupy the two hours a day for six weeks.

Minor.

COURSE TWENTY

COSTUME DESIGN

Design principles and color theory ar here studied in terms of dress. The course includes practical problems in representation, costume draping in cloth or paper, collecting and classifying dress in order to create an enthusiasm for proper and artistic dressing.

Minor—six weeks only—two hours daily.

COURSE TWENTY-ONE

APPLIED DESIGN

A minor course offerd for those especially interested in the subject. The course includes six weeks' pottery, four weeks' jewelry making, and two weeks' textil weaving.

One hour each day-Minor credit.

MANUAL TRAINING

The contribution of manual training to a complete and rounded education is now generally recognized, and the number of schools where it is given a place in the program is constantly increasing. The demand for teachers who can conduct the work continues to be far in excess of the supply.

The Manual Arts Bilding, for which the 45th General Assembly appropriated \$100,000, with its equipment, together with the other resources of the Illinois State Normal University, affords excellent facilities for the training of special teachers in the manual arts. It is the intention to place special emfasis upon those forms of manual training that ar practicable under ordinary conditions in Illinois with reasonable expenditures for equipment and materials, and to give comparativly little attention to those lines of work which ar impracticable by reason of the great expense involvd.

An outline of the courses offerd is given herewith:

The Special Summer Announcement, issued early in the spring each year, should be consulted for information as to courses in this department that ar offerd in the summer terms.

In addition to the preparation of special teachers there still exists the important task of equipping the ordinary teacher with a knowledge and appreciation of handwork in the school so that he may the more intelligently co-operate with the supervizor or, if opportunity offers, himself make a beginning in connection with other school work. Every effort will be made to meet the needs of teachers who desire this sort of preparation.

Classes in handwork in the Model School offer opportunities for observation and assisting in practical work with children.

COURSE ONE

BENCHWORK IN WOOD

The aim of this course is to teach the important tool operations used in woodworking. It is arranged to prepare teachers who wish to teach benchwork in the upper grammer grades and high school. The work as outlined can be taught in any school that has an equipment of benches and hand tools. The students make a number of useful articles which illustrate various tool processes. The sharpening of tools and a study of materials used in woodworking will receiv due attention. Class demonstrations and shop-talks will be given at each new stage in the work.

No credit will be given towards graduation for less than 120 hours' work. Students taking the special manual training course must complete 240 hours' work.

COURSE TWO

WOOD-TURNING AND PATTERN MAKING

The fundamental tool processes used by the wood-turner will be taught by demonstration and practis at the lathe.

A number of problems in spindle turning, cylinder turning, beads, fillets, cones, concave and compound curvs, etc., will be required before taking up face-plate work and pattern-making which will follow. A number of patterns will be made which will illustrate important principles, such as draft, cores, fillets, shrinkage, partings, etc.

Prerequisit, Course one.

COURSE THREE

FURNITURE CONSTRUCTION, USING WOODWORKING MACHINERY

The use of woodworking machinery by advanst students in manual training tends to make the work far more vocational, and gives a training on various machines that is hard to get in a commercial shop, where the workmen lern to work on only one or two machines. Students will be taught to use the circular and band saws, and jointer, the surfacer, the mortis machine and the trimmer, and to perform the hand tool work necessary for fitting and assembling.

Factory methods, in which the same process is repeated till skill and speed ar acquired, ar followd to a large extent where several articles of the same kind ar wanted.

The various methods of wood-finishing receiv considerable attention.

Prerequisit, Course one.

COURSE FOUR

ELEMENTARY WOODWORK AND CARPENTRY

The purpose of this course is the laying out of a course of study for the fifth and sixth grades, with a group of models for each grade, suitable for any school, no matter how small the equipment. Lectures ar given on the various fases of the work, and each student makes a course of study and a list of models. These ar made as original as possible. A part of the time is given to bench work on the models above mentiond, and to model lessons in teaching manual training in these lower grades.

Instruction is given in the care and use of tools, the selection of the equipment, and devices for introducing the course with limited equipment.

The second half of this course is designd for preparing teachers to teach the fundamental principles of carpentry in the upper grades and high school.

COURSE FIVE

ORGANIZATION OF MANUAL TRAINING

This course is pland for persons who wish to teach manual training. Lesson plans, equipments and courses of study ar prepared by the students. Class demonstrations and the various methods of presenting a lesson ar considerd.

In order that the student may become familiar with the literature of manual training, the philosofy, psychology, and pedagogy of manual training ar discust, and library reading and theme writing ar required.

Prerequisit: Course 1. Fall term only.

COHRSE SIX

MECHANICAL DRAWING

This is a course for beginners and includes working drawings, lettering, geometrical drawing, problems in projection, intersections of solids, development of surfaces, tracing and blue printing, and a few drawings in isometric projection. The important principles in the theory of drawing ar taught, and much attention given to neat ink work, using the drafting conventions usually employed in the best drafting rooms.

Students may furnish their own instruments, or rent them from the department. Bennett's *Problems in Mechanical Drawing* is used as a text. Two hours a day for 24 weeks, 2 credits. Taught every term. This course is required of all students taking the special manual training course.

COURSE SEVEN

MACHINE DRAWING

The special conventions of machine drawing, sketching, detailing, assembling, etc., ar presented to the student in this course. Machine details, such as screws, bolts, etc., ar drawn to illustrate the technical conventions used by draftsmen in making such drawings. Free-hand sketches of machine parts ar made on platted paper and later machine details and assembled drawings ar made with the drafting instruments from the sketches. Some of the important parts of a gasoline engin ar drawn, and the strength and proportions of the part ar criticized from standard formulas workt out by engineers who hav made a special study of gasoline engin designs.

This is an advanst course for students who wish to be prepared to teach mechanical drawing in high schools.

Two hours per day for twelv weeks. One credit.

Prerequisit: Mechanical Drawing.

Text: Mechanical Drawing for High Schools. Sloan, Evans, and Zimmerman.

COURSE EIGHT

ARCHITECTURAL DRAWING

Architectural letters, conventions, details, sections, study of materials, specifications and mechanical perspectiv ar taught in an elementary way as drawing the complete plans of a small two-story frame house designd by the pupil.

Prerequisit: Course 5.

Two hourse per day for twelv weeks. One credit.

Text: Mechanical Drawing for High Schools. Sloan, Evans, and Zimmerman.

COURSE NINE

HISTORY OF MANUAL TRAINING (MINOR)

This course follows the efforts of the educational reformers in Europe in introducing the manual arts into the schools. The theories and practises of Comenius, Rousseau, Pestalozzi, von Fellenberg and others ar reviewd, followd by a study of the more successful work in modern times of Cygnaeus, Salomon, and Della Vos

The history of the manual arts in the United States and the development by the various movements which hav produced educational and vocational courses will be followd carefully. Lectures, reading and written work.

Winter term.

COURSE TEN

FURNITURE DESIGNING AND CONSTRUCTION

Manual training in its best form is now to a large extent applied design. Craftsman furniture with pleasing lines, spaces and attractiv proportions will be designd and some of the articles constructed and finisht in soft artistic shades. A brief study of the various types of furniture will be made.

Library reading on design, cabinet construction and tool use will be required.

Prerequisit: Course 1. (Spring term only.)

HOUSEHOLD ART

It is the purpose of this department to provide for the adequate training of teachers of Household Art. During the second year, students ar required to do practis teaching in the training school.

Courses 1, 2, 3, and 6 may be taken as elective by students in other departments.

Materials ar furnisht by students for all courses except Course 6, for which a fee of two dollars is charged.

COURSE ONE (FALL TERM)

HAND SEWING IN ELEMENTARY SCHOOLS

This course includes hand sewing, crocheting, knitting, darning, mending. It gives work to be used in the elementary grades and works out a course of study for these grades.

A history of the beginnings of the arts and industries of primitiv life and the development of weaving and spinning is studied in this course.

Text: In Courses 1-3. Textils, Gibbs.

COURSE TWO (WINTER TERM)

GARMENT MAKING

Machine sewing and care of machines, drafting patterns and making of undergarments, simple embroidery, economical use of materials.

The textil work includes the study of cotton and wool.

COURSE THREE (SPRING TERM)

DRESSMAKING I.

Principles of dressmaking, drafting patterns; selection and economical cutting of materials; the making of shirt-waist suits and more elaborate cotton dresses; with especial emfasis on artistic color combinations and suitable design.

Prerequisit: Course 2.

Textil work includes the study of flax and silk.

COURSE FOUR (FALL TERM)

DRESSMAKING AND MILLINERY I.

Pattern drafting; the making of a cloth gown; lessons in fitting. Working out clothing budgets for different incomes. Discussion of clothing for different members of the family. The making of a child's dress. The making and covering of a buckram frame finisht with suitable trimming. Development of fundamental principles of hat construction; renovation and use of old materials. A winter hat.

Prerequisit: Course 3.

COURSE FIVE (WINTER TERM)

THEORY OF TEACHING HOUSEHOLD ART

This course considers the relation of Household Art to education, the method of teaching the subject in various kinds of schools; its relation to the curriculum; planning of lessons and courses of study; certain problems of equipment and cost. Library work and term papers.

COURSE SIX (Spring Term)

DRESSMAKING AND MILLINERY II.

The making of a silk dress, with special emfasis upon artistic color combinations and suitable designs. Construction and covering of wire frames in various ways; renovation and use of old materials; and the making of spring or summer hats.

The subjects to be discust in this course ar history, simplicity, suitability and cost of hed dress; the claims of the Audubon Society.

Text: Textils, William H. Dooley, D. C. Heath & Co.

RURAL SCHOOL COURSE (FALL AND WINTER TERM)

This course has for its aim the presentation of such work as can be accomplisht in rural schools. The first six weeks ar devoted to stitches, seams, mending, and the making of household articles; the last six weeks to the making of undergarments. The time and place for sewing in the rural schools will be discust.

HOUSEHOLD SCIENCE

The courses in Household Science ar pland to cover the six terms of two regular school years and one summer term.

They ar designd for high-school graduates, and the correlated studies required ar those considerd necessary to the preparation of a teacher of Household Science in the public schools.

Courses 1, 2, and 3 in Household Science ar open to regular students who wish to take up the work as an electiv without pursuing all the correlated studies. Classes in Household Science ar limited to eighteen members. Students ar registerd in order of application.

Materials used by students ar charged at cost.

COURSE ONE (FALL TERM)

COOKERY I.

The first course of cookery is based on a study of Food Principles. The composition and dietetic value of food materials and the processes of cookery best adapted to each class of foods are discust and each principle is illustrated by the preparation of simple dishes. The practical work is designd to acquaint the student with all the fundamental processes of cookery and the most attractiv methods of serving. At the same time the sources, history, manufacture, and cost of each food is considerd. Daily, two periods each day.

COURSE TWO (WINTER TERM)

COOKERY II. HOUSEHOLD MANAGEMENT I.

The second course in cookery provides instruction and practis of an advanst character and a wider application of the principles studied in the first course. Open to all who hav completed Course I in Cookery. Three lessons per week, two periods each.

The first course in household management is a systematic study of the duties of the housekeeper, embracing the foundation, administration, and maintenance of the home. Lectures in sanitation, household accounts, and domestic servis ar included in this course. Two lessons per week, double periods.

COURSE THREE (Spring Term)

COOKERY III. HOUSEHOLD MANAGEMENT II.

The third course in cookery is a continuation of the work given in the first and second courses. It deals with the planning

and preparation of menus, the choice and arrangement of appropriate garnishing and correct methods of servis. Simple and inexpensiv meals ar pland to meet the requirements of a standard dietary and a number of these meals ar prepared and servd by the students.

The second course in household management is devoted to the study of marketing, serving, and laundry work.

The course in marketing is carried on by lectures and by practical observation in visiting markets. The course deals with the quality, price, and uses of foodstuffs and takes up a study of the Pure Food Laws and Requirements. One day per week.

The course in serving includes the care of dining room and pantry; care of silver and cutlery; washing of dishes; care of lamps; serving of brekfast, luncheon, dinner, and invalid's tray; preparation of fruit, salads and sandwiches, and the use of a chafing dish.

The laundry work is based on a study of the scientific principles involved in the softening of water, the preparation and action of soap and other clensing agents, and the methods of handling the various fabrics in order to remove stains, disinfect and clense garments, and restore the natural finishes by the different methods of drying and ironing. The subjects ar arranged in a series of practical lessons according to the nature of the processes, and the work is carried on in a well-equipt laundry.

Course III is open to all who hav completed Courses I and II in Cookery, and Course I in Household Management.

Daily, two periods per day.

COURSE FOUR (FALL TERM)

COOKERY IV.

INSTITUTIONAL COOKERY

The fourth course in cookery combines the skill in cookery, acquired during the earlier courses, with the knowledge of correct methods of serving, practist in the serving course; and carries out, in practical manner, the planning of menus and serving of meals. The students acquire skill in handling large quantities of material, a knowledge of correct combinations, cost of materials, time of preparation for meals and labor involved in serving a large number of people.

Daily, two periods per day.

Open to all who hav completed Courses I, II, and III in Cookery, and Course II in Household Management.

COURSE FIVE (WINTER TERM)

COOKERY V.

The fifth course in Cookery includes the work in invalid cookery, advanst cookery, and demonstrations in cookery.

Daily, two periods per day.

Invalid cookery as taught includes the preparation of food for a sick room, special stress being laid upon the digestibility and nutritiv value of foods. Dainty and attractiv servis is constantly emfasized. The condition of the patient in relation to nutrition is considerd and special diets for various pathological conditions ar emfasized.

The dishes prepared in advanst cookery ar of a more elaborate and complicated nature than those taken up in the earlier courses and more formal servis is studied.

The latter portion of the term is given up to the demonstrations in cookery in which methods of teaching household science by demonstration and lecture ar studied and practist.

Open to all who hav completed Courses I, II, III and IV in Cookery and Courses I and II in Household Management.

COURSE SIX (SPRING TERM)

Five lessons per week for 12 weeks. Lessons 2 periods each. This course in Household Management includes lectures on home nursing, dietetics, and principles of teaching Household Science.

The course in home nursing is pland to enable one to render intelligent assistance in the sick-room. The subjects coverd ar the furnishings, warming, and ventilating of the sick-room; making of the sick-bed; bathing and dressing the patient; administering food and medicin; lifting and care of helpless patients; preparation and application of poultises, bandaging, emergencies, diet in disease and invalid cookery. Twice per week.

A study of dietaries involve consideration of nutritiv value, digestibility and cost of foods; the balanst ration; combinations of foods suitable for workers, old persons, infants, and invalids, and economic dietaries. Twice per week.

The course in Household Science principles embraces a study of the meaning and history of the household science movement; household science equipments, courses and methods of study; and the qualifications necessary in a teacher of household science. Once a week.

Course VI is open to all who hav completed previous courses in Cookery and Household Management.

COURSE SEVEN

HOUSEHOLD SCIENCE FOR COUNTRY TEACHERS

This is a special course of 120 hours in the study of foods, marketing, cooking, and serving. An effort is made to adapt the work to the needs of the country home, and to present methods of class organization and suggestions for correlation that will be of value to the country teacher.

Winter term.

AGRICULTURE

The four-year program in agriculture is designd for students who wish to become teachers of agriculture in township high schools, consolidated schools, village or city schools. In addition to giving the students a thoro course covering the entire field of scientific agriculture, it is well fortified with courses in physical and biological science. These courses form an excellent foundation for the study of scientific agriculture, and equip the student for teaching two or more lines closely allied with each other.

Students may take the first two years of the four-year program and secure the regular Normal-School Diploma, after which they may either teach or take the remaining two years' work and secure the degree of Bachelor of Education. Students ar urged to finish the four-year program before attempting to teach, because of the better training and greater possibilities which the graduate from the four-year program obtains.

The Normal University owns and operates an excellent farm of about ninety acres, lying close to the campus. The sole purpose of this farm is to demonstrate good farming methods to the students taking the courses in agriculture.

The farm is primarily a dairy farm, a feature which increases the activities of the farm and adds to the student's possibilities of practis and observation. Pure-bred horses, cattle, swine, and poultry ar grown.

The farm is equipt with a modern house, barn, and other farm bildings, and sufficient modern machinery for a farm of its size. Other bildings ar to be erected before the end of the year.

A five-field rotation is carried on, and a careful and thoro system of farm bookkeeping is followd, recording all data of costs and receipts. These records ar available to students in the course, enabling them to study scientific farming from the business point of view.

ANIMAL HUSBANDRY COURSE ONE

ELEMENTARY STOCK JUDGING

A study of the history, character, and form of the horse, cow, pig, and sheep. Emfasis is placed upon the market classes and grades of the various animals, upon their feeding qualities, and upon their capacity for the production of milk, meat, wool, work, and speed. Some time is given to the identification and scoring of the various types of poultry. A study of the pedigrees and show-ring achievements of the various animals is made.

Fall term.

Text-book: Harper's Animal Husbandry for Schools.

ANIMAL HUSBANDRY COURSE TWO

ELEMENTARY STOCK FEEDING

A study of the classes of food nutrients and their functions in the animal body. Digestion, absorption, and assimilation. The extent and nature of the demands for food for maintenance, growth, fattening, milk, wool, and work. The principles involvd in the selection of rations. Choice of feeding stuffs and the compounding of rations.

Winter term.

Text-book: Harper's Animal Husbandry for Schools.

ANIMAL HUSBANDRY COURSE THREE

ADVANST STOCK FEEDING

This course includes a study of the most successful and economical methods of feeding horses, cattle, sheep, swine, and poultry. Special emfasis is placed on the growth and development of the young animal, on feeding for the production of pork, milk, wool, and egs, and in the feeding of the horse for work. The work will be largely practical feeding tests carried on with animals on the University Farm, and a study of the results obtaind at the various experiment stations.

Fall term.

Text-book: Henry's Feeds and Feeding.

ANIMAL HUSBANDRY COURSE FOUR

PRINCIPLES OF ANIMAL BREEDING

This course is a study of the history of the development of the various breeds of domesticated animals, a study of the various herdbooks where the important families of each breed ar traced. The methods used by breeders in establishing desired characteristics. The scientific application of the laws of heredity, selection, variation, atavism, etc.

Spring term.

Text-book: Davenport's Principles of Breeding.

ANIMAL HUSBANDRY COURSE FIVE

ANIMAL PATHOLOGY

A study of the detection, prevention, and treatment of the pathological diseases of the farm animals. Hog cholera, tuberculosis, and abortion will be treated more fully than other diseases of less importance to the farmer.

Spring term.

Text-books: Government and State Publications.

AGRONOMY COURSE ONE

CEREAL AND FORAGE CROPS

A study of the varieties of wheat, corn, oats, barley, and rye. The judging, grading, and storing of the cereals for seed or market. A study of the forage crops which demand the attention of the farmer in the autum months will be taken up. Alfalfa and silage will receiv considerable attention.

Fall term.

Text-book: Hunt's Cereals in America.

AGRONOMY COURSE TWO

SOIL PHYSICS

A study of the formation and classification of soils; capillary, hygroscopic, and gravitational water; the effects of drainage and color of soils on soil temperature; the granulation and puddling of soils; the preparation of the seed bed and the proper tillage for the various crops.

Winter term.

Text-books: Lyon and Fippins' Soils and Mosier and Gustafson's Laboratory Manual for Soil Physics.

AGRONOMY COURSE THREE

CROP PRODUCTION

This course includes a study of the methods of planting and cultivating the various cereal and forage crops. The treatment for insect, weed, and fungous enemies of the cereals and forage plants. Conservation of the water supply for cereal and forage crops. Curing and marketing of hay.

Spring term.

Text-book: Hunt's Cereals in America.

AGRONOMY COURSE FOUR

CONCRETE CONSTRUCTION AND DRAINAGE

This course includes a study of the making of concrete floors, walls, blocks, tile, posts, tanks, and troughs. Considerable time is spent in the mixing and reinforcing of concrete. The work in surveying consists of the surveying of field, the location of fence lines, and the laying out of systems of tile drains. The work in surveying and drainage is largely field work.

Fall term.

Text-books: State and Government Bulletins.

AGRONOMY COURSE FIVE

FARM MACHINERY

A study of the various types of power and field machines for the farm. The major part of the course will be devoted to a study of the gas and steam engin, and the more complex forms of field machinery of the farm.

Winter term.

Text-book. Davidson and Chase's Farm Machines and Farm Motors.

AGRONOMY COURSE SIX

SOIL FERTILITY

This course is a study of the various types of crop rotations, together with a study of the fertilizers necessary to maintain the soil fertility. Considerable time is spent in growing pot cultures, and in a study of the results obtaind on fertilizer plots.

Fall term.

Text-book: Hopkins's Soil Fertility and Permanent Agriculture.

AGRONOMY COURSE SEVEN

SOIL FERTILITY

This course is a continuation of Agronomy Six. It consists of a detaild study of the results obtaind in soil fertility tests at the various state experiment stations.

Winter term.

Text-book: Hopkins's Soil Fertility and Permanent Agriculture.

AGRONOMY COURSE EIGHT

FARM MANAGEMENT

A course in selecting the farm, planning the rotation, locating the fields, lots, and bildings, and keeping the farm accounts. In addition to the work as outlined above the student spends some time in acquainting himself with the various forms of legal papers with which the farmer has to deal.

Winter term.

Text-book: Warren's Farm Management.

HORTICULTURE COURSE ONE

ORCHARDING AND GARDENING

This course includes a study of graftage, cuttage, layerage, pruning, and spraying. Some time is spent in laying out orchards, selecting trees, planting trees, and cultivating the orchard after planting. The insect enemies of the tree, bush, and vine fruits ar studied. In connection with the work in fruit culture a study of the hot-bed, and cold-frame is taken up. The planting of the various plants follows the work with the hot-bed and cold-frame. The insect enemies of the vegetables ar also studied.

Spring term.

Text-books: Bailey's Principles of Fruit Growing and Bailey's Vegetable Gardening.

HORTICULTURE COURSE TWO

LANDSCAPE GARDENING

A course in the arrangement, and planting of the trees, shrubs, and flowers necessary for the proper decoration of home and school grounds. The care of flowers, trees and shrubs in winter and summer. The pruning of trees and shrubs.

Spring term.

Text-books: Government and State Bulletins

DAIRY HUSBANDRY

MILK AND MILK PRODUCTS

A course in the operation of the Babcock test, the testing of herds, the detection of adulterated milk, and the testing of milk, cream, butter, or cheese for butter fat, acid, bacteria, and adulterants.

Spring term.

Text-book: Farringdon and Wolls' Testing of Milk and Its Products.

COUNTRY SCHOOL DEPARTMENT

The purpose of this department is three-fold. 1. To prepare teachers for country schools. 2. To assist country teachers activly engaged in teaching. 3. To help stimulate rural progress thruout Illinois, especially in local country communities. Much stress is placed by the department upon the sociological aspects of country teaching. In this connection the leadership of the country teacher is emfasized.

Two programs ar offerd thru the Country School Department: a one-year program for students who hav had two years of high-school work and a two-year program for graduates of the eighth grade. The completion of these programs counts two years toward the regular Normal-School Diploma. Program O provides the remaining courses needed for graduation. Upon finishing these courses students ar given a special certificate testifying to the accomplishment of this work. These certificates may lawfully be accepted by county superintendents as evidence of qualification for third-grade teacher's certificates.

The special pedagogical and sociological courses outlined below ar taught by the director of the department.

COUNTRY SCHOOL SPECIAL COURSES

COURSE ONE

COUNTRY SCHOOL TEACHING

This course deals with the immediate problems of country-school organization and teaching and the social relationship of the country school to the rural community. Country-school improvement is considered from four aspects, namely: physical, social, educational, and administrativ. The idea of the school as a social center for the upbilding of the country community is emfasized thruout. This course is the equivalent of the course in the Teaching Process taught in other programs.

Winter and spring terms.

Texts: Country Life and the Country School, Carney. The Teacher and the School, Colgrove.

COURSE TWO

COUNTRY SCHOOL ORGANIZATION AND MANAGEMENT

The following topics indicate the trend of this course: The physical improvement of country schools; socializing the country school; better organization and management for country schools; country-school administration in Illinois; leadership of the country teacher; and the school as an agency of progress for the improvement of farm life.

For students of the two-year program.

Spring term, first year.

Text: Country Life and the Country School, Carney.

COURSE THREE

COUNTRY SCHOOL PROBLEMS

In this course the special adaptation of the various subjects the country school is considerd. A large part of the time is devoted to the Illinois State Course of Study. Some time will be devoted to the observation of a country school at work. Definit problems in the presentation of subject-matter to country children ar discust. The working out of at least one country teaching problem is required of each student, as the making of a series of arithmetic problems, or the preparation of a list of themes for country-school composition. Exceptionally capable students or experienst teachers may do practis teaching in lieu of some of this observation.

Spring term.

Chief text: The Illinois State Course of Study.

COURSE FOUR

BURAL EDUCATION

An electiv for seniors and juniors who ar preparing to teach in consolidated schools, in high-priced country schools, and in the pedagogical departments of high schools which train country teachers.

This course attempts two things:

- (1) To show the social relations of the country school to the rural community:
- (2) To make clear the meaning and character of the "redirected country-school curriculum." These points ar developt in a constructiv manner, particular emfasis being placed upon the method of attack under average conditions. Among the topics considerd ar: characteristics of the rural community; rural leadership; opportunity of the country teacher for leadership; the country school as a community center; the adaptation of the conventional subjects of study as arithmetic, geografy, etc., to country children; and the organization and teaching of such new subjects as agriculture and domestic science. Constructiv exercizes, as the organization and management of a consolidation campain, the conduct of a Country Life Club and the preparation of a set of farm problems in arithmetic, ar frequently assignd. Considerable library reading is also necessary.

Fall term.

Texts: Gillette's Constructiv Rural Sociology and Country Life and the Country School.

COUNTRY SCHOOL EXTENSION

To assist country teachers activly engaged in teaching and to stimulate general rural progress thruout the state, a special division of Country-School Extension is maintaind by this department. Teachers enrolling in this division select and attack one definit problem of school or community improvement and render a written account of their procedure. Aid is furnisht to those co-operating in this way thru lectures, stereopticon talks, bulletins, exhibits, the loan of country life books, and otherwise. Details of this work and of the general organization of the department ar given in the Normal School Quarterly for October, 1911.

COMMERCE

In September, 1914, a department of Commercial Branches was establisht to prepare teachers in this fast-growing type of vocational education. The second floor of the Gymnasium Bilding has been remodeld and equipt with suitable furniture and appliances to carry on the work. While the department has been organized primarily as a training school for commercial teachers, yet it will give excellent training to such students as prefer secretarial positions in the business world.

The program is seven terms in length, covering two years' time. The following courses ar offerd to those who enrol in the department:

COURSE ONE

ACCOUNTING

Three terms' work in the theory and practis of accounts, beginning with the more simple transactions and records of a small retail business under a single proprietor. This small business is later enlarged to include wholesaling and the ownership is changed to a partnership. Students ar carefully traind not only in the clerical work of bookkeeping but also in the analytical work of the accountant. In the spring term, upon the completion of the assignd work in wholesale partnership, the type of business is again changed and the student is introduced to corporation accounting. Cost accounting as applied to the manufacture of a staple product is studied and many problems in factory accounts, offiis management, and production factors, ar taken up.

Text: Bookkeeping and Accountancy, H. M. Rowe Co.

Opportunity for practis teaching in bookkeeping in the University High School is given to students who hav successfully completed the Normal course in Accounting.

COURSE TWO

BOOKKEEPING (SUMMER TERM)

The inductiv development of the principles of double-entry bookkeeping and their practical application in as many sets as the length of the term will permit.

Text: Budget 101, Commercial and Industrial Bookkeeping, Rowe.

COURSE THREE

ACCOUNTING (SUMMER TERM)

The theory of accounts as developt from the standpoint of the practising accountant. Solution of accountancy problems and principles as applied to business statements, balance sheets, analyses, bankruptcy, the designing of bookkeeping systems, etc.

Prerequisit: Course one.

Text: Elements of Accounting, Klein.

COURSE FOUR

SHORTHAND (FIRST YEAR)

The development of phonetic writing as conceived by Gregg and workt out in his manual. The Manual is supplemented by work in shorthand, penmanship and in progressiv exercizes intended to increase finger dexterity and a thoro understanding and skilful application of the principles of shorthand.

Text: Manual of Shorthand, Gregg.

COURSE FIVE

SHORTHAND (SECOND YEAR)

A careful review of the Gregg Manual, followd by progressiv dictation taken from standard dictation texts and covering many types of business correspondence. During the winter term it is expected to bring the student to a writing speed of approximately 120 words per minute, and to that end there is much dictation extending over a wide variety of material, i.e., sermons, addresses, syllabi, testimony, legal forms, etc. Teaching methods ar introduced in the spring term and students ar encouraged to increase their shorthand skill to verbatim speed.

Texts: Gregg Speed Practis, Gregg. Shorthand Dictation Exercises. Eldrige.

COURSE SIX

TYPEWRITING (FIRST YEAR)

The touch method is insisted upon in this course. The work done in the course is based upon the subject matter as containd in a standard text, such as the Fritz-Eldrige Expert Typewriting. Supplementary work begins during the winter term and consists of direct dictation of plain copy for speed and accuracy, plain copy at sight, and blindfold dictation. In the spring term, shorthand transcript work is begun. The formal work includes thirty-six lessons in the text as a minimum requirement for one year's credit. Thirty words, net, per minute, is the rate pupils ar expected to reach at the end of the Spring term.

Text: Expert Typewriting, Fritz-Eldrige.

COURSE SEVEN

TYPEWRITING (SECOND YEAR)

The second year's work begins with a thoro review of fingering, to be followed by that portion of the text not included in the outline for the first year. A portion of the time is devoted to transcript work. Tabulation, rough drafts, and special work in typing makes up the schedule for the winter term. Frequent speed tests as well as examinations for proficiency certificates, ar given. During the spring term offis appliances ar used in connection with this course, and the students ar given the course in offis training as set forth in "Offis Training" by Sorelle. Students ar expected to reach the certificate speed of sixty words net, per minute, on plain copy.

Text: Expert Typewriting Fritz-Eldrige; Offis Training for Stenografers, Sorelle.

COURSE EIGHT

BUSINESS CORRESPONDENCE

This course is given in the fall term of the first year and includes such review of the general rules of grammar, punctuation, and sentence construction as the instructor deems necessary as an introduction to the writing of business letters, advertizements, pamflets, etc. Especial attention is given to correspondence from the point of view of selling.

Text: English for Business Uses, Cody.

COURSE NINE

COMMERCIAL LAW

This is one of the most important of the commercial branches and is very widely taught in the high schools. Two terms ar given to the consideration of Commercial Law. The features to which most attention is given ar Contracts, Negotiable Instruments, Sales, Agency, Insurance, Bailments, Partnership, Credits and Loans, Corporations, Real and Personal Property, and Settlement of Estates. The preparation of legal forms is included in the course.

Text: Elements of Business Law, Hufcutt.

COURSE TEN

COMMERCIAL ARITHMETIC

This subject is offerd for one term in the second year. The course is designd to include the usual applications of arithmetic to business organization, management, accounting, and to such miscellaneous problems as arise in various types of business. The use of many ruled forms is an important feature.

COURSE ELEVEN

SALESMANSHIP AND ADVERTIZING: (SUMMER TERM AND SPRING TERM OF SECOND YEAR)

This course includes the study of the laws of appeal and response as applied to business; the advertizement in its composition, form and effectivness; and the principles of salesmanship (retail, wholesale, manufacturing, and personal).

Text: Art of Selling, Sheldon,

COURSE TWELV

HISTORY OF COMMERCE

The general history of business progress is surveyd: attention is given to the economic changes that hav taken place in the past century, and to the future outlook along the lines of transportation, banking, commercial treaties, and world markets.

PHYSICAL EDUCATION

This department exists because the state needs as teachers men and women of sound helth who ar traind to care for the physical welfare of their pupils and set before them for imitation the example of a dignified and erect bearing.

Its aims ar two-fold:

- 1. For the individual: to supply systematically one essential element in hygienic living, namely, muscular exercize; and to encourage as related to this, proper habits of sleep, bathing, ventilation, and diet, to correct common postural defects, and develop as accurate muscular control as may be possible in the time available.
- 2. For the teacher: to make clear the relation between helth and efficiency, the hygienic demand for systematic exercize in elementary and high school, and to supply a fairly comprehensive quipment of practical work for use in such schools.

Three terms' work in physical training is required of all students, and every effort is made to adapt work to individual needs. This work is to be taken in the first year unless there be excellent reasons for postponing it. A careful record of the helth history of each entering student is taken and a physical examination given. A special class is provided for those thus shown to be unequal to the work provided for the average beginner. In the rare cases where exercize even in this class is not suitable, individual work is prescribed and sufficient observation of class work assignd to enable the future teacher to conduct simple exercizes in the school rooms and make intelligent use of games in the school yard.

For physical training women ar required to hav a specific gymnasium suit, which can be orderd after arrival at a cost of \$3.75. Every woman needs also an athletic skirt for tennis, hockey, and field work in Nature-Study, Geografy, and other sciences. This may be orderd on arrival or made at home. It should be strong, wide, and of shoe-top length, preferably navy blue or black.

Men require for the gymnasium two black sateen shirts, gray trousers, and black tenis shoes. These can be obtaind after arrival at a cost of not more than \$4.00.

COURSES FOR WOMEN

COURSE ONE

Gymnastics, folk dances, plays and games ar taught with consideration of their distinctiv effects and suitability for use in the school room or on the playground. Weekly lectures deal with personal care and social behavior. Especial attention is given to nose, throat, and teeth, bathing, posture, and dress.

Four hours' floor work, one hour lecture.

COURSE ONE (A)

Arranged for women whose helth history and physical tests show them not redy for Course I. Enrolment will be limited and special attention given to individual cases.

COURSE TWO

More vigorous and difficult forms of gymnastics, dancing, and games. Apparatus work is introduced and a study of Bancroft's *Posture Training of School Children* is substituted for weekly lectures.

Time requirement as for Course I.

COURSE THREE

Posture training is continued during the first part of the term; gymnastics with hand apparatus and simple forms of esthetic dancing ar introduced; organized games playd out of doors occupy a prominent place in this course. Three hours of exercize and one hour for discussion of principles and methods.

COURSE FOUR (ELECTIV)

Outdoor sports, including volley ball, basket ball, hockey, tennis. Reading, discussion, and note books. Time required same as preceding courses. Open to women whose physical tests show them equal to such work.

COURSE FIVE (ELECTIV)

Esthetic dancing is offerd twice a week during both winter and spring terms. Students taking all of this work receiv one minor credit. Note books required. Open to all women qualified.

COURSE SIX (ELECTIV)

A six weeks' course dealing with the possibilities of the play-ground, its organization, and equipment. Playground activities ar considerd in detail. Exhibitions, field days, and festivals ar studied. To be preceded by Courses One and Two, and if possible accompanied by supervizion of play in the training school.

COURSES FOR MEN

All men, except those physically disabled, ar required to take the first three courses during the first year of attendance, unless acceptable reasons ar given for not doing so. All such men must hav the work completed before graduation, unless excused at opening of the school year before graduation time.

COURSE ONE (FALL TERM)

BASE BALL, FOOT BALL, SOCCER, AND TENNIS

Practis: Four periods per week. Base ball, foot ball, and tennis will begin with the opening of the term. Soccer will take the place of base ball when cool wether comes. Each man must show a certain degree of skill in *two* of the four sports to obtain credit for the fall term.

Pedagogy: One period per week.

1. Rules for foot ball, soccer, and tennis. 2. Lectures on personal hygiene, training and first aid.

Books: Official Foot Ball Guide, Official Soccer Guide Official Tennis Guide, Note Book.

COURSE TWO (WINTER TERM)

ELEMENTARY MARCHING, CALISTHENICS, HEVY APPARATUS, VOLLEY BALL, INDOOR BASE BALL, AND BASKET BALL

Practis: Five periods per week.

COURSE THREE (SPRING TERM, MEN)

BASE BALL, TRACK AND FIELD ATHLETICS, AND TENNIS

Practis: Four periods per week. Base ball two periods. Track work two periods. Credit will be given for tennis two periods per week, provided one period is given to base ball and one to track work.

Pedagogy. One period per week. Rules for base ball. Rules of track and field. Training.

Books: Official Base Ball Guide, Intercollegiate Athletic Handbook, Note Book.

COURSE FOUR (ELECTIV, FALL TERM)

Prerequisit: Course 1.

Practis: With University foot ball team, or class team in base ball and soccer.

Pedagogy: Four periods per week. 1. Rules of foot ball, soccer, and tennis from the standpoint of coaching and officiating. 2. Officiating in class games and 'Varsity practis games. 3. Training. 4. First aid to injured.

Books: Official Football Guide, Official Soccer Guide, Official Tennis Guide. Text-books will be announst at opening of the term.

Major: One credit.

COURSE FIVE (ELECTIV, WINTER TERM)

Prerequisit: Course 2.

Practis: Two periods per week in intermediate gymnastics—free handwork, light apparatus, and hevy apparatus.

Pedagogy: Three periods per week. Practis in teaching marching and gymnastics. Place of physical training in education. Leading systems of gymnastics. Methods of teaching. Physiological effects of exercise.

Books: Teaching of Elementary School Gymnastics, W. P. Bowen; Manual of Marching, Cornell and Berry; Official Basket Ball Rules; Official Volley Ball Rules; Note Book; extensiv library work.

N. B.—Those taking this course will need to keep open either the seventh period or the eighth period two days per week to use in teaching squads in Course 2.

Major: One credit.

COURSE SIX FOR MEN (ELECTIV, SPRING TERM)

Prerequisit: Course 3.

Practis: University base ball and track team, or class base ball and track team.

Pedagogy: Four periods per week. Base ball rules from standpoint of coaching and officiating. Track base ball rules from standpoint of coaching and officiating. Athletic administration. Management of athletic meets. Play and playgrounds.

Major: One credit.

COURSES IN LIBRARY METHOD

COURSE ONE

THE USE OF THE LIBRARY

Ten weekly lessons for all first year students. The practical part of the work is to be applied by each student to the work that he has on hand for the term. Wednesdays to take the place of Physical Training.

COURSE TWO

THE FORMATION AND CARE OF SCHOOL LIBRARIES

Eight weekly lectures, spring term. Same in five weekly lectures, first summer term. Course illustrated with exhibits of books and library equipment. An hour a week outside of the lectures will give full time for examining the exhibits and arranging the note-books.

COURSE THREE

LIBRARY PRACTIS

The librarian offers a course also in library apprentisship which includes simple details of the care, management, and use of a library, with mending books, mounting pictures, etc. From four to six students ar employd each term as library assistants; this affords further instruction and practis in library administration.

Special instruction is offerd to juniors and seniors in the preparation of term papers and graduation themes.

Fall term.

KINDERGARTEN DEPARTMENT

This department includes a well-equipt kindergarten in charge of a director and assistant.

It offers to students an opportunity for observation and for practis in the teaching of classes. Children may enter at the age of four, and ar supposed to remain two years. The kindergarten is primarily a social institution and stands for co-operativ activity. It aims to develop children physically, mentally, and morally, by directing their natural activities in an educational way. Because the kindergarten has proved a potent factor in transforming modern educational theory and practis, there has come about a demand for primary teachers who hav been traind in the principles and methods of the kindergarten.

The Kindergarten Primary Course is offerd to meet this demand. It covers a period of two years. Students ar admitted at the opening of the fall term only. They must be graduates of an approved high school, or hav done equivalent work.

Four terms of observation and teaching in the Kindergarten, and two terms of teaching in the primary grade ar required.

KINDERGARTEN TECHNICS (JUNIOR YEAR)

This course includes a study of the gifts, occupations, songs, stories, plays and games of the kindergarten: original exercizes ar pland by each member of the class, and presented for discussion and criticism.

Gifts: This comprises a study of the Froebelian gifts as educational toys, in connection with other play materials, to discover their value as mediums of expression.

Occupations: The kindergarten occupations ar studied in connection with modern construction work and nature materials suited to the needs of children.

Games and Rhythms: In this connection a study is made of the play instincts of children. Plays and games adapted to different stages of the child's development ar considerd, their educational value noted, and practis given in playing kindergarten games. A classification of plays and games is made, including motor, sensory, and dramatic plays, traditional ring games, rhythmic exercizes and marches.

Story-Telling: A study is made of the different kinds of stories, their origin and value. Principles of selection, adaptation, and classification ar considerd and opportunity is given to tell stories to different groups of children.

Text: Stories and Story-Telling, St. John.

KINDERGARTEN THEORY (JUNIOR, TWO TERMS)

The aim of this course is a study of Froebel's general theories and Mother Plays, in connection with modern child-study literature.

Texts: Froebel's Educational Laws, Hughes; The Mother Play, Froebel.

KINDERGARTEN THEORY (SENIOR YEAR)

Fall term.

This course includes a study of the history of the kindergarten and the relation of the kindergarten to the primary grades.

Text: History of Kindergarten in American Education, Vandewalker.

Winter term.

This course deals with the principles of program-making, of problems in admistration, and of the Montessori system of education.

SPECIAL COURSE (SPRING TERM)

This course is pland for primary teachers who wish some knowledge of the principles and practis of the kindergarten. It is recommended to all teachers who ar training for primary work. All fases of kindergarten work ar discust, with daily observation of groups of children.

PRACTIS TEACHING

The training department consists of the elementary school including a kindergarten and eight grades, and of the University High School. Fifteen teachers devote their entire time to this department; several others assist in the training-school work.

The Training School is designd to give careful and extensiv training in the art of teaching in all grades and in all the special subjects taught in public schools. Each student in the Normal School and Teachers College is required to teach three terms. In some cases the daily observation and criticism of a class, followd by a written or oral discussion ar taken in lieu of one term in each of the three departments, Primary, Intermediate, and Grammar School. But students desiring to fit themselvs for any particular grade of school work, or any special branch of study, ar given an opportunity to do so. Teachers of satisfactory training and experience who wish to prepare themselvs for expert work as training teachers ar allowd all the advantages of the Training School.

The work of teaching is carefully supervized by the training teachers. Each student teacher is required to write out the plans of recitation one week in advance. These plans ar closely examind by the training teacher and, where necessary, discust with the student teacher and revized. The instruction itself is also observed by the training teacher, and helpful criticisms ar given in private. Each practising teacher is held fully responsible for the control and management, as well as for the instruction of the class. He is expected to develop skill and power in management and instruction of a class as a whole, and at the same time to study and adapt the work to the individual ability and disposition of each pupil. As far as possible during the last two terms of his instruction, the student teacher is given charge of a room; so he is supervizing one class at the same time that he is teaching another.

Students who hav had no experience in teaching find it best generally to observ a class one full term in the Training School before undertaking the instruction of a class. Careful criticism and discussions of the lessons observed ar required of each ob-

server.

Each week, two illustrativ or "critique" lessons ar given by experienst teachers. Teachers and observers ar required to observ one of these lessons each week. An hour following the lesson is devoted to its careful discussion under the direction of the supervizor of the Training School. This gives each teacher an opportunity each term to see eleven such lessons carefully presented and thoroly discust.

In all observation of the teaching attention is directed—

1. To the teacher's preparation for the work thru mastery of subject matter, lesson planning and providing external means.

2. To the teacher's skill in teaching as shown in skill in assignment, in skill in questioning, in energy, in disciplin, in power of holding attention thru interest, in rediness to meet emergencies, in attention to details of form and position, in ability to discern and meet the needs of individual pupils, in the use of apparatus and other aids, in attention to the physical condition of pupils, in attention to the language of pupils.

3. To the teacher's personal fitness as reveald in his attitude towards his work, his ability to make use of criticism, his voice, language, manner, and personal care in mechanical work.

Certain students ar also appointed regularly to supervize

the children at noon, recesses, and during study periods.

The training teachers present illustrativ lessons, at such times as ar convenient, for the benefit of the students who ar preparing for work in the Training School.

COURSE OF STUDY IN THE TRAINING SCHOOL

A brief statement of the course is made below. A detaild analysis by subjects, years and terms will be furnisht on application.

Literature.—Daily exercize in Mother Goose, Robinson Crusoe, Hiawatha, The Jungle Book, and stories and poems from other writers thru the first three years. From the fourth year thru the eighth the literature is combined with the reading.

Reading.—Three lessons per day during the first two years. One lesson per day in all other except the seventh. In the seventh year reading alternates with history.

Writing.—Writing exercizes occur daily during the first two years and one term of the seventh year.

Spelling.—Daily spelling exercizes thru the seventh grade upon words occurring in regular studies.

Language.—Incidental training thru the first six years.

English Grammar.—Daily exercizes thru seventh and eighth years in all terms but one; two lessons per week in that term. The work follows the Illinois State Course of Study.

Arithmetic.—The Illinois State Course of Study is strictly followd thruout the eight years.

Geografy.—Daily lessons from the third year thru the seventh. History.—Oral presentation of pioneer history stories during the fourth year. Daily lessons in United States History during the fifth and sixth years and two terms of the eighth year. In the seventh year history alternates with reading.

Civil Government.—Last term of eighth year.

Nature Study.—Daily lessons in garden, the campus, or the greenhouse in the fall and spring terms in the last four years; in the spring terms of fifth, sixth, and seventh years, in fall and spring terms of the eighth year.

Elementary Physics.—Daily lessons during winter terms of all years but seventh and eighth and also in the fall term of fifth and seventh years.

Astronomy.—Fall term of sixth year.

Physiology.—Oral lessons in lower grades. Daily lessons with text book in winter terms—seventh and eighth years.

Music.—Twenty minutes daily in all grades.

Drawing.—Exercizes averaging three per week in all grades above second. In primary grades associated with other studies.

Manual Training.—Daily exercizes in primary grades, alternating with drawing in grades three to six; in seventh and eighth years pupils spend two hours per week at bench work in shop.

Physical Training.—Brief daily exercizes in schoolroom. Regular lessons from the physical director on Wednesday. Seventh and eighth grades hav regular work in the gymnasium on alternate days.
